Be this as it may, I was doubtlessly making very proper progress towards a re subrication of the joints, and a general overhauling of the machinery that regulates the move ments of the man, when an indefinable something began to interfere, at first so slight as only to brace up the little finger of my right hand, which always takes the initiatory step when any thing is to be done; then, a general pulling up of the muscles that have the honor of directing my motions; lastly, the tightening of the two little drums that are placed at the inner gate of my script of the most precise and elegant writer. ears-and I suddenly heard a tremendous clatter of fire bells, and the rattling of engines and hose

The fortress of Buda, opposite the city of Pesth, has fallen into the hands of the Hungarians after a severe conflict. It was carried by assault. The report of the capture of Fiume, in Croatia, by the Hungarians, does not appear to be confirmed. The defeat of a Russian division by Bem is in doubt. Dublin, May 31.—The Potato Crop.—There is a complete dearth of news this morning. All hopes are now directed to the growing harvest, which so far promises to be one of more than average abundance, with, however, one fearful drawback, namely, the prospect of a fourth failure of the potato crop. The tatal disease, it seems, has already shown itself in two instances, and in districts where it is said a greater breadth of land than usual has been and they with the control of th said a greater breadth of land then usual has been laid down with the crop. The Chomel Chronicle says—'Some samples of young shoots of potatoes have been submitted to us for inspection, in which the disease of the late years was unmistakeably evident. We would fain hope this calamity is partial, but should think. It culpable were we to encourage too much dependence on the present crop by omitting the notice of any failure which may come under our observation?

der our observation."

THE CHOLERA.—The disease had nearly disappeared in Ballinashoe, but it has broken out with considerable virulence in the town of Athlone. There have been several insoluted cases in the metropolis, several of which have terminated fatally, owing partly to neglect of the precautionary remedies on the first appearance of the symptoms.

London, June 2.—The Yienna Gazette publishes a proclamation signed by a great number of nobles and landowners in Hungary, inviting all persons of their class, and the friends of order generally, to form a volunteer corps to co-operate with the Imperial army in patting down the insurrection, and thus avoiding the shame of owing the restoration of order to the intervention of a foreign army. The process of folding their arms, and summitting tamely to the opprossion of the terrorists, had displayed a little and the Emperor have been discovered, put down. The municipalty of Presburg, responding to this appeal, has ordered the formation of a foreign army. The process of the council, Jermoloff, rose and told the emperor that Napoleon by his obstinacy ruined himself, and his majesty might meet the same fate! and then the general quitted the chamber.

The same journal contains intelligence that several plots against the Emperor have been discovered, and instead of being sent to Siberia, were at once hung. It would appear that the army ing to this appeal, has ordered the formation of a foreign army of the council having been sent from St. Petersburg.
