Allegheny:

FELLOW CITIZENS I do not know of any thing like an apology the course of those firemen who at the late fire in ous services of the French in restoring him to the Allegheny, used any means to prevent or dissuade other firemen from exerting themselves in arresting the conflagration. I witnessed the progress of that calamity. I saw the orderly citizens of Pittsburgh and Allegheny-men and little boysforming into lines to convey the water in buckets to extinguish the fire. I saw those lines several illowance, as it comes through French sources .- | jeers and taunts at those citizens whom humanity

> I am rejoiced to say that I did not see one whose face I had ever looked upon before. I trust that there were none there who had received their training in this community. If there were any firemen in any way concerned in the outrage, who have any decency left, that decency was chiefly shown by their absence. They might have given ountenance to the plan of mischief, but they had onscience enough left to keep them from participating in its execution; for in such cases, " conscience makes cowards of us all."

Now, I am perfectly willing to see all persons. participating in such an outrage upon humanity, held up to public indignation; for this is a proper punishment of such offences, and tends greatly to deter those who have no manly principle to guide hem, from being led into such vices. I know not what degree of scorn is too great for such degraded characters; and we can hardly bring ourselves to the exertion required to correct the mischief, unless when our indignation is aroused against the mischief maker. But still, we must not forget that the final cause

or natural purpose of such indignation at vice, is o spur us on to seek a remedy for it. The mere punishment of the offence will not prevent its rem currence, if we allow the exciting cause to remain. If the present state of our fire police tends criminal punishments. We must reform the institution. One of the first evils which strikes the attention

is impossible to disguise the conviction, that this houses is the demoralizing tendency of the present organization of this department. It has been a subject of complaint for many years that the enbe compelled to work at a fire as well as the poor nia. Whilst no one can be more opposed to the gine houses are moral nuisances—that some of them have become the daily and nightly resort of. rowdies and vagabond boys, who disturb the neigh. porhood by their noise, profanity, and other unbecoming behavior-that they have been schools of rice for young boys of the neighborhood, who have not the benefit of any better teaching at home—that there are large numbers of worthless idlers belonging to the companies, who find false alarms a pleasant excitement, and who are ready to furnish the stimulant with sufficient frequency; and thus the time of well disposed citizens is use-

lessly wasted to the amount of many thousand dollars a year. Another evil arising out of the present organization, is the undue degree of esprit de corps, or er roneous sense of honor which is always found. connected with our fire associations. This may be thought by some to be a strange objection Yet in this is involved nearly all the disorders among firemen which have lately disgraced American society. It is found that in such associations, man's standing is estimated very much by his attachment to his engine and company; and in the ordinary course of things, his particular at tachments swallow up the more general ones; his fire duties become more important than those of his occupation—his espru de corps than his love of to judge in those matters, and may consider thempioions of his associates.
