

DELEEN STANLEY, A MEMORABLE STORY.

He will not let me go, said the girl; 'no, Mary, how did he check and lips are, and his eyes, how bright they are.' 'Would you not let little Henry go and live with the mother in heaven?' said Mary gently; 'how he moans and looks at us so sorrowfully; would you not let him go so he never would be sick again?'

'I think I would,' said the little girl, while the large tears fell fast on the baby's small head; 'for this mother, could not whip him; but I should be so lonely.'

'No long after this conversation, Mary Ashton, who was nursing Henry, was alarmed by the change in his appearance. The afternoon was wild and stormy, the wind whistled mournfully around the house. Mrs. Stanley, who for some days had not been sober, lay in a state of intoxication on a bed in the other room. Her husband, who was much exhausted by sitting up at night with Henry, had fallen asleep on his chair. Mary did not wish to disturb him, but, although she told Julia, who was sitting on a stool by her side, to watch him. In a moment, he was by her side.

'Alas!' said he, as he lifted the cold hand of the dying child, 'no nothing save my child—my beloved Henry.'

'Then going to his wife, he tried to wake her, but in vain. He called to Julia, 'look at Henry!' 'Oh, father!' said Julia, 'look at Henry!' 'The poor little one is in spasms, and the father could not bear the sight, left the house, and when he returned he found the child dead. He thought of going to the physician; but he had that morning told him that he had tried every means, and that nothing could save Henry. He resided several miles off, and he feared that the child would be returned by the death bed of a dying child, to see the small hands clasped in agony; to hear his dying moans; and behold the death film gathering over the once bright and laughing eyes; and then to see the stillness and paleness of death passing over the little face.

Deathful was the anguish that filled the heart of Mrs. Stanley, as he lay his dying body, drunk and degraded with mother.

'Ellen,' said Mrs. Stanley, 'you child come and darling Henry, is dying; would you come and look at him before he leaves us.'

'Let me alone!' was the reply; 'I want to sleep.' 'A deep groan, the heart stricken father returned, and took one of his dimpled hands in his. As the baby's small hand lay in that of his father's, Julia took one in hers, and with streaming eyes, watched every motion of the dying child. After a moment's struggle, the weary spirit of little Henry was released from all suffering, and was borne away by angels to his eternal home. Happy child! early released from care and sorrow, taken from the power of a doctor's medicine, and from the agonies of a dying father, to be forever happy with the Lord. His death was unthought of by a mother's love; he had not there to smother his pillow; he could not amid his sufferings, cling to her support, or pillow his dying head upon her bosom.

Here she lay; her face fair and beautiful, now swollen and disfigured; her cap was torn and partly off; her hair once soft and glossy, now tangled masses around her face. These were the tokens of the means of the dying child, the unconscious of her little Julia, or the deep anguish of him who had him promised before to love until death.

And what had wrought this mighty desolation? Even that non-descript poison which operates in the numerous drug shops in our city, behind the screens and counters, where many a one is destroying his own soul! Oh! how many will never know the value of what they have lost, till they awaken in eternity. Bitter were the tears that fell on the white forehead of little Henry.

'He is better, father, whispered the little Julia; 'see how little he lies; he must be sleeping!'

THE ASSOCIATED PRESS

Circulation 1200 Daily. PITTSBURGH MONDAY MORNING, OCTOBER 22, 1890.

The Four Centa Oration. We are requested to announce that the PEOPLE will hold a meeting in the Danmore hall, to give expression to their views in relation to the inauguration of the new President.

Parlor Politicians. The Philadelphia News, in accounting for the overwhelming defeat of the Federal party in Pennsylvania, alleges that it was brought about in consequence of the unpopular appointments made by the administration at Washington. Says the News:

There is more in this paragraph than meets the eye at first view. There are two classes of politicians, or factious, in Pennsylvania. At the head of one faction is Governor J. Johnson, the leading Republican Governor at the head of the other faction is Senator Cowan. The Johnson clique are more or less in the parlor and bar-rooms of hotels, and do all the talking and scheming. This class, through the influence of the Governor, have succeeded in securing for themselves nearly all the offices in the state.

HOUSE OF REPRESENTATIVES. Adams—Daniel Lock, William Egan, John Miller, R. C. Walker. Agate bear the deer.
