Tin Roofing.

THE subscribers most respectfully announce to their fellow-citizens that they have perfected their arrangements to carry on the business of Tin Roofing on an extensive scale.

It is now close on four years since we first introduced it in roofing in this city. During that time we have covered over 200 squares of roofing, and in all cases we believe we have given the most entire satisfaction. This kind of roof has been applied to all the very best buildings in this city, including, among a large number of others, the two splendid buildings on Penn street, owned by John L. Shoenberger and John Fleming, and the Post Office, always considered the most durable, there can be no doubt; in proof of this, we can refer to the almost universal application of this kind of roofing in the larger cities on the sea-board during the last twenty years; and from our enquiries we believe, we have yet to learn of any one of these roofs having been worn out. The roofs covered with tin in our own city are open to the examination of all who feel an interest in the matter. We have also prepared a miniature plan of roofs, which may be seen at our establishment, whereany other information will be given with pleasure.
