Dr. Coxme, in his valuable writings on the "Physiolo-gy of Digestion," observes that "a diminution of the dur quantity of the Gustrie Jnice's a prominent and all-pre-valling cause of Dyspepsia;" and he states that "a dis-tinguinged professor of medicine in London, who was severely afflicted with this complaint, finding everything else to fail, had recourse to the Gastrie Juice, obtained from the stomach of living animals, which proved com-pletoly meccessiol." Dr. GRANAM, author of the famous works on "Vegetri-ble Dicti," says: "fit is vremarkable fact in physiology, that the stomachs of animals, maccrated in writer, im-part to the fluid the property of dissolving various arti-cles of food, and of effecting a kind of artificial diges-tion of them in no wise different from the natural digest-ive process?

From recent experiments we know that field is solved as rapidly in an artificial digestive fluid, prepared from Pepsin, as it is in the natural Gas-tire Juice itself." Professor DUNGLEON, of the Jefferson College, Phila-delphia, In his great work on Human Physiology, devotes more than fifty pages to an examination of this subject. His experiments with Dr. Beaumont, on the Gastric Juice, obtained from the living human stanachand from animals, are well known. We saw and understood that the food we est, was converted into blood, which repaired the waste of the naimal machine the food is fael, which keeps at a life heat the internal first that warm and invigorate our innerman. The blood is an electric fluid which carries this heat to every ramification of the body, even to the extremilies of the hair and horny nail. Food gives the body strength, Brandreth's pills give blood the necessary power to throw out from itself all imparities, thus ren-dering the stream of life pure and healthy.
