Democratic State Conventions. AT READING, For nominating candidates for GOVERNOR and CANAL

MEB, on the 4th of June, 1851, as, fixed by the Williamspo AT HARRISBURG,

a candidates for SUPHEME BENCH. on th th of June, 1851, as fixed b the regular action of the State Central Committee

To Advertisers. The MORNEY Post has a larger circulation than any subscription paper published in Pittsburgh. To busi-ness mean tadiords an excellent medium for Advertising and being the only Democratic paper issued in Alleghe-ny county, it goes into the hands of a class of readers resched by no other paper. Advertisers will be good enough to bear this in mind.

MONEY MARKET. OFFICE OF THE MOBNING POST, Pittsburgh, January 24, 1851.

GENERAL REMARKS .- At this season of the year there is little want of money occasioned by the pressure of business. But business obligations have to be met, and commercial payments absorb a very

considerable amount of funds, and thus money constantly in active demand. The banks are disthere were received 5,481,439 from California, and counting as liberally as their means will allow ; but 32,889 from New Mexico ; and up to October 31, they confine their operations to business paper of short dates. What the banks decline is often sold New Mexico 5,592. The highest amount received in any one year beto brokers, or on the streets to persons who employ capital in such investments ; and as every name has ore the California gold began to come in freely, principles. its price, the hawker seldom fails in effecting a sale was in 1834, when the receipts amounted to 893,000. Street discounting is quite a business, and we should The whole amount from 1824 to 1848 inclusive, was think, from the activity of friend TAYLOR on the only 1,991,688. In 1849 it went up to 5,767,052, pavements, that it is in a flour lehing condition .--and by October 31, 1850, it reached to 22,189,817-There is a great demand for local stocks, and the so that the gold received from California, in the first supply is insufficient to meet it. The want of silver

to make change is confined to persons who have as much as was received at the mints in the twentynumerous hands to gay off; and as the banks only four years previous to the discovery of the gold in pay out gold, silver is often, for that purpose, that country. bought at a small advance. Silver is tolerably abun dant in the country, in consequence of the Small Note Law of last winter, which brought the coin

from other States. Still there is a want of change exported 193,396,048, leaving an excess of imporfelt in business communities, and more of the small gold coinage is imperatively called for from Congress. If the Philadelphia Mint is incapable of supplying the demand, others should be at once established. There are numerous applications to our Legislature for permission to the banks of this State

to issue small notes. What the Legislature will do, we cannot say, for it is questionable whether th banks would issue them, while silver is at a premium over gold, unless it should be those banks which are out of easy access from their location. In another part of to-day's Post we published a ports by 2,894,202.

The subscription of the metals was nearly doubled, but the production of the two metals. But then, before we come to this conclusion, we have two questions to determine. 1. Will the produc-tion of gold continue at its present rate 3 2. Will the production of silver not also greatly increase? In the first place, how long Russia and Califor-nia will continue to supply such quantities of gold as they have done in 1850, we could not venture to predict, after all that has happened in the his-tory of mining. But this we are bound to say: After carefully considering all the evidence which has been furnished as to the capabilities of Cali-formia, firet the experience we have had of Rus sia for the last two years, to say nothing of the sai for the last two years, to say nothing of the sources for the production of gold, we think there is every reason to expect, at least for some years to come, supplies equal at least to those of 1850. If such, then, prove to be the case, and if the quantity of silver produced shall continue as sta-tomary as it has done of late years, then there can be little doubt that a closer approximation must take place between the two metals Admitting The sinker programina has dusting there and also gramperile. This streng produced shall continue as sta-tomary as it has done of late years, then there can be little doubt that a closer approximation must take place betw
