This syrup contains no Optum, Calomel, or any mineral whatever, but is composed entirely of those illood whatever, but is composed entirely of those illood influence upon the Lungs, and their connected organs, Its immediate affect is to allay all irritation; and gently remove the philega and other morbid secretions from the Throat and Air-Passages; thus relieving the Oragh, by ribduing the sinflammation and other causes which give rise to it. It also stimulates and inparts a healthy tone to the Lungs themselves, thereby, enabling them more thoroughly to remove from the first part of the condition of incurable CONSUMFTION. It also exerts a decided action upon the skin, and assists nature in expelling, through the Exhalents, much of that morbid matter which would otherwise be thrown back upon the Lungs, thus relieving them of a part of their work, and rendering the system pure and healthy. When tuber less are forming, it cheeks their development and further progress; or if ulceration has taken place, it assists the Lungs in throwing off the corrupted matter, soothes the irritation, heals the ulcerated excites and restores them again to healthy action. This Medicine, therefore, is not a politicite merely, which only relieves for the time being, but is a thorough curativation, as its takes at the very root of the disease, and by removing it, removes at once all its remote and attendant consequences. This is its distinguishing characteristic—a property possessed, in equal power, by no other medicine of like nature, now before the public.
