Its great powers to heal, have, since then, become fully appreciated by the community, and we allege that the longer it is tried the more certain will segreat fame spread. It is not the remedy of a day, got up for the sole purpose of making money; but, one, which we popeelye, will continue to be used when all nostrums have been fargatten. The PETROLEUM is a Natural Remedy, elaborated in the depths of the earth by a power and agency that faughs to scorn all human competition. It is our duty, when we write about a medicine, that we write rauru—that we say nothing calculated to deceive those who may trust our word or our confidence in our statements. The sick are very apt to catch at any thing that promises relief from dissense. A story can hardly be too highly wought to an swer the object of gulling or humbugging some of them. It has become enatomary in the Atlantic cities for congregations to insure the lives of their Pastors, and on Christmas or New Year's day to make the family a present of the policy. This is certainly an excellent way of showing their regard for their Alimister, whose salary in very many cases is scarcely equal to his immediate wants. To the man of family, at his death, it is a consolution beyond expression to know that his helpless little ones are thus provided for.

ANOTHER SCIENTIFIC WONDER!

PEPSIN I

THE TRUE DIGESTIVE FLUID,

OF Gastric Juce!

A OREAT DYSPEPSIA CURER,

DEPARED from Rennet, or the fourth stomach of the Ox, after directions by Baron Liesto, the great Physiological Chemist, by J. St. HOUGHTON, M.D., No. 11, North Eighth street, Philadelphia, Pa.

This is a truly wonderful remedy for INDIGESTION, DYSPEPSIA: JUNNICS, CONSTIPATION, LIVER OWN HEALTH, and DEBILITY, curing Jaier Nature's own method, by Nature's own agent, the Gastric Juice.

Half a teaspoonfull of this Fluid, infused in water, will digest or dissolve Five Pourns of Roast Bref. in about two Houses, out of the stomach.

SCIENTIFIC EVIDENCE!

Baron Lixing, in his celebrated work on Animal Chemistry, says: "An artificial Digestive Fluid, analogous to the Gastric Juice, may be readily prepared from the mucous membrane of the stomach of the call, in which various articless of food, as meat and eggs, will be so soft-ened, changed and digested, just in the same franner as they would be in the human stomach."

Dr. Penerma, in his famous treatise on "Food and Diel," published by Powlers & Wells, New York, page 35, states the same great fact, and describes the method of preparation. There are few higher authorities than Dr. Percita.

Philosophy of Brandreth's Vegetable Phils.

When the theory of the circulation of the blood was established, the secret aprings of vitality were then partially exposed to our view. We saw and understood that the food we cat, was converted into blood, which repaired the waste of the animal machine; the food is fucl, which keeps at a life heat the internal first that warm and invigorate our inner man. The blood is no electric flaid which carries this heat to every ramification of the body, even to the extromities of library and horny nail. While the blood is thus the seat of life, it is also the seat of discuse. Food gives the body strength; Brandreth's pills give blood the necessary power to throw out from liself all imparities, thus rendering the stream of life pure and healthy. If men were more singere, there would be fewer religious creeds; and if they kept close to nature's laws in the management of their bodies, they would require little medicine. As men grow intelliligent they will become wiser had happier; even now, their wisdom is proved by the fact, that, when sickness assalist them, they use Brandreth's Vegetable Univeral Pills, which soon restore them to health. They are peculiarly adapted to the climate; had require no extra care when they are used, to other dictor clothing. They should be always in the house, so that upon the first indication of sickness is fixed in the s Gloves, Linens, Cheeks, Cloths, Cassimeres, Cassimers and Jeans.

Together with an immense variety of other Goods, all of which will be marked down to lower prices than any of their previous sales.

There are few higher authorities than Dr. Percita.

Dr. Comme, in his valuable writings on the "Physiology of Digestion," observes that "a diminution of the due quantity of the Gastic Juice is a prominent and all-prevailing cause of Dyspepsia;" and he states that "a distinguished professor of medicine in London, who was severely afflicted with this complaint, finding everything clase to fall, had reconsent to the Gastrio-Juice, obtained from the stomach of living animals, which proved completely angecasful."

Dr. Gastan, author of the famous works on "Vegetable Diet," says: "It is a remarkable fact in physiology, that the stomachs of animals, macerated in water, impart to the fluid the property of dissolving various articles of food, and of effecting a kind of artificial digestion of them in no wise different from the natural digestion of them in no wise different from the natural digestion of the min and the state of the Blanchard, Phila, 1849, pp. 321-2) says: "The discovery of PEPSIN forms a new era in the chemical history of Digestion. From recent experiments we know that food is dissolved as rapidly in an artificial digestive fluid prepared from Pepsin, as it is in the natural Gastric Juice itself."

Professor Dunottson, of the Jefferson College, Philadelphia, in his great work on Human Physiology, devotes more than fifty pages to an examination of this subject. His experiments with Dr. Beaumont, on the Gastric Juice, obtained from the living human stomach and from animals, are well known. "In all cases" he says, "digestion occurred as perfectly in the artificial as in the natural digestions."

Those who will contemplate our geographical position, and the extent of our population, can have no doubt as to the eligibility of our situation for an enterprise of the kind. As to health, including all seasons of the year, we deny that anyother city has more.

The first class of the Law and Medical Departments of this institute were small, but the genilement composing them are talented and in the highest degree respectable—a favorable omen for the tature prospently of the finatique.

That the public may be shatisted of the permanetry of this school, we feel it our duty to state, that the Trustees and Faculty form a unit in action, which angura well for its fature success; and that the precular internal organization which connects them, cannot be interupted.

Tim Bulseribers take this method to inform proper lookers, house-bulders, and all others intereste that they still continue the business of Tin Roofing, all lits branches. Their skill and experience in this part of the business, has hitherto enabled them to give entity holders, house-builders, and all others inisressed, that they atill continue the business of Tin Robing, in all its branches. Their skill and experience in this part of the business, has hitherto enabled them to give entire satisfaction. And they hope, that by continuing the same policy of using the best materials, and employing skillfall workmen, to keep up this favorable impression. If the question of Tin Robing was new, or just brought before the notice of this community for the first time, we would consider that the importance of the subject would justify us in extending our views on its superior advantages. This, however, is not the case: We shall therefore, confine ourselves to a few remarks. On the 6th day of June, 1854, (nearly seven, years ago.) we finished our first job of Tin Robing in this place. From that up to the present time, we have covered with in the robis of the finest and most costly buildings that have been created in this county. We have given our views on a previous occasion on the superior advantage of Tin-vover iron, as a covering for houses. And time, the great tester of all things, has but too clearly proven the correctness of our opinion.

Again, if we place Tin in juxta-position, with Slate as a covering for houses, we think thattin will bear a favorable comparison, with some decided advantages.—These advantages are, that when this is used the roof can be made much flatter—thereby saving maierials, in the length of rafters, brick in the gable ends—making the house-casy of access in case of a fire, and showing a border finish and appearance. Also, when, in it used the group country of access in case of a fire, and showing a border finish and appearance when the steed the roof can be made much flatter—thereby saving materials, in the length of rafters, brick in the gable ends—making the house-cary of access in case of a fire, and showing a border finish and appearance when the saved the remains of our eastern cities in proof what has been advantages—things indispensible on siter roof 200 Men Wanted Immediately, T THE CHARTIERS RAILROAD.—The w alone. THE subscribers respectfully inform the citizens of Pittsburgh and vicinity, that they are now fully prepared to fill orders for GRAVEL ROOFING, in a manner not to be sarpased in this city or elsewhere. From their experience in business, they feel confident that they will render satisfaction to all those who may give them work. The superiority of Gravel Roofs over any other kind, particularly in case of fire, is too well known to require any argument in its favor. To those who nave unacquainted with our work, we be feave to refer them to Miessrs. Thomas Higgett, Sr., John F. Perry, Rody of Patterson, M. Kane, Jr., and others, for whose we have done work. Orders thankfully received and promptly attended to We will be found on Wylie, sireet, be ween fligh and Tutinel streets.
