[The subscribers take this method to inform property holders, house-builders, and all others interested, that they still continue the business of Tin Roofing, in all its branches. Their skill and experience in this part of the business, has hitherto enabled them to give entire satisfaction. And they hope, that by continuing the same policy of using the best materials, and employing skillful workmen, to keep up this favorable impression. If the question of Tin Roofing was new, or, just brought before the notice of this community for the first time, we would justify us in extending our views on its superior advantages. This, however, is not the case. We shall therefore, confine ourselves to a few remarks. Again, if we place Tin in juxta-position, with Slate as a covering for houses, we think that tin will bear a favorable comparison, with some decided advantages.—
These advantages are, that when tin is used the roof can be made much flatter—thereby saving materials, in the length of rafters, brick in the gable ends—making the house easy of access in case of a fire, and showing a better finish and appearance. Also, when tin is used the guters are worked in, thereby saving the extra and reavy expense for copper guters, copper flashings, &c.,—things indispensible on slate roofs. If further reasons were deemed necessary, we could offer the experience of our eastern cities in proof what has been advanced, as it is a well known fact that New York and othereastern cities very generally prefer even the for their most costly and splendid buildings, notwithstanding they have a full supply of slate at their doors. With these remarks we will leave the subject with those interested, and will take pleasure in giving further information when called on. JOHN DINLAP & CO., feb17 corner Market and Second sts.

Curious Case.—The following evidence is only one of thousands of similar character, and conclusively provesthat Dr. Howe's Sarsaparilla is one of the most effective remodies ever discovered:—Br. Hows:—Deat Sir.—By son, when about sir months old, broke out with that dreadful disease, Scrofulars Scree, over the face and body; and for two years and a half I stide every means: that could be suggested by my friends. I also had the advice of six or seven of the best physicians in the country, without effecting a cure, and I almost wished the little sufferer dead, that it might be freed from its pains. During the last six months, the sores were so distressing and painful, myself and wife were up with it night and day, for weeks together, and we had given up all hope of ever raising our little one. At length, a friend advised us to try your Shaker Sarsaparilla. Reluctantly I tried it, and I have reason to bless God for it, for, in neary thorttims, it headed up the sorm, so that there is scarcely even a scar to be seen. We only regret that we did not hear of and commence using it sooner, as we are satisfied it would have sayed a great deal of suffering and expense. The child is now well and hearty. We do unnestistingly consider y our Shaker Sarsaparilla one of the best preparations now in use. JOHN STANSBURY,
