It is not more than one year ago since this great remedy was brought before the public, for the relief and cure of disease. Its great powers to heal, have, since then, become fully appreciated by the community, and we aliege that the longer it is tried the more certain will its great fame apread. It is not the remedy of a day, got up for the sole purpose of making money; but, one, which we conceive, will continue to be used when all nostrums have beer forgotten. The PETROLEUM is a Natural Remedy, elaborated in the depths of the earth of a power and greacy that lawbs to scorn all human uanuty desired.

Tin Hoofing.

THE subscribers take this method to inform property holders, house-builders, and all others inicreated, that they still continue the business of Tin Roofing, in all its branches. Their skill and experience in this part of the business, has hitherto enabled them to give entire satisfaction. And they hope, that by continuing the sume policy of using the best materials, and employing skillful workmen, to keep up this favorable impression. If the question of Tin Roofing was now, or just brought before the notice of this community for the first time, we would justify us in extending our views on its superior advantage. This, however, is not the case. We shall therefore, confine ourselves to a few remarks. On the 6th day of June, 1814, (nearly seven years ago.) we finished our first job of Tin Roofing in this place. From that up to the present time, we have covered with tin the roofs of the linest and most costly buildings that have been erected in this county. We have given our views on a previous occasion on the superior advantage of Tin over iron, as a covering for houses. And time, the great tester of all things, has but too clearly proven the correctness of our opinion.

Again, if we place Tim in Juxta-position, with Slate as a covering for houses, we think that the will bear a favorable comparison, with some decided advantages.—These advantages are, that when the is used the roof can be made much dattor—thereby saving meterials, in the length of rafters, brick in the gable ends—making the house easy of access in case of a fire; and showing a better finish and appearance. Also, when the is used the gutters are worked in; thereby saving the extra and reavy expense for copper gutters, copper flashings, &c.—things indispensible on state roofs. If further reasons were deemed necessary, we could offer the experience of our enature tites in proof what has been advanced, as it is a well known fact that knew York and other castern citi Physiological Chemist, by J. S. HOUGHTON, M.D., No. II, North Eighth street, Philadelphia, Pa.

This is a truly wonderful remedy for INDIGESTION, DYSPEPSIA, JUNIOE, CONSTIPATION, LIVER COMPLAINT, and DEBILITY, curing after Nature's own method, by Nature's own agent, the Gastric Juice. Haif a teaspoonful of this Fluid, infused in water, will digest or disroive Five Pounds of Roast Beef in About two neurs, out of the stomach.

SCIENTIFIC EVIDENCE!

Brigol Lyng in his celebrated work on A nime! Chem. Baron Liena, out of the stomach.

SCIENTIFIC EVIDENCE!

Baron Liena, in his celebrated work on Animal Chemistry, says: "An artificial Digestive Fluid, analogous to the Gastric Juice, may be readily prepared from the mucous membrane of the stomach of the calf, in which various articles of food, as meat and eggs, will be so softened, changed and digested, just in the same manner as they would be in the human stomach."

Br. Persura, in his famous treatise on "Food and Diet," published by Fowlers & Wells, New York, page 33, states the same great fact, and describes the method of preparation. There are few higher authorities than Dr. Pereira.

Dr. Combe, in his valuable writings on the "Physiology of Digestion," observes that "a diminution of the due quantity of the Gastric Juice a prominent and all-prevailing cause of Dyspepsia; "and he states that "a distinguished professor of medicine in London, who was severly afflicted with this complaint, floding everything else to fail, had recourse to the Gastric Juice, obtained from the stomach of living animals, which proved completely anceessfal."

Dr. Gerham, author of the famous works on "Vegetable Diet," says: "It is a remarkable fact in physiology, that the stomachs of animals, macerated in water, impart to the fuild the property of dissolving various articles of food, and of effecting a kind of artificial digestion of them in no wise different from the natural digestion of them in no wise different from the natural digestion of them in no wise different from the natural digestion of them in no wise different from the natural digestion of them in no wise different from the natural digestion of them in no wise different from the natural digestion of them in no wise different from the natural digestion of the famous works the "Chemistry of Man." TAISH—Mackerel, Nos. 1, 2 and 3; Philosophy of Brandreth's Vegetable Philosophy of Brandreth's Vegetable

WHEN the theory of the circulation of the blood
was established, the secret springs of vitality
were then partially exposed to our view. We saw and
understood that the food we cat, was converted into
blood, which repaired the waste of the animal machine;
the food is fael, which keeps at a life heat the internal
first that warm and invigorate our inner man. The
blood is an electric fluid which carries this heat to every
ramification of the body, even to the extremities of the
hair and horny nuil. While the blood is thus the seat of
life, it is also the seat of disease. Food gives the body
strength; Brandreth's pills give blood the necessary
power to throw out from itself all impurities, thus rendering the stream of life pure and healthy. If men were
more sincere, there would be fewer religious creeds;
and if they kept close to nature's haws in the management
of their bodies, they would require little medicine. As
men grow intellifigent they will become wiser and happier; even now, their wisdom is proved by the facet that,
when sickness assails them, they use Brandreth's Yego
table Universal Pills, which soon restore them to health.
They are peculiarly adapted to the climate, and require
no extra care when they are used, in eather diet or clothing. They should be always in the house, so thet upon
the first indication of sickness they may be used. One
dose in the beginning is more potent for good, than a
dozen after the sickness is fixed in the system. In colds,
coughs, asthma, theumatism, costiveness, fevers, and is
