APOLLO BUILDINGS, FOURTH STREET,

Sign of the Bec-Hive.

THE SUBSCHBERS have opened a Genilemen's Fur
Inithing Store, in connection with an Odd Fellows'
D-pot, in which are to be found a variety of Fancy
Goods and Odd Fellows' Regala, never before presented to a Pittsburgh public, by a single establishment.

From Philadelphia, they are in regular receipt of
Odd Fellows' Registers, Ladge Blank books, Gaveks, and
other Lodge articles. The Regalia exhibited at their
counter is most gorgeous and admirably assorted; nothing of the sort, so entirely exquisite, has ever been seen
in this market in such profusion.

The Gentlemen's Furnishing Department is plentifully supplied with a variety of superb and delicately
wrought articles of dress. The variety is entirely too
great to enumerate in a moderate space; we must,
therefore, direct the public to an investigation of the
Stock itself. All that we can say in this connection is,
that at our Establishment the gentlemen of taste can be
supplied with any article in our line, manufactured out
of the best materials and by the most experienced
hands. We solicit an examination of our stock; it
composes a variety which challe negs comparison.

A large lot of Fine Silk and Lines Shiris; Pancy
Stocks and self adjusting Croatis; Gloves and Horistry
of various kinds, and in fact every article of comfort of
luxury which a gentlemen of good taste would fancy.

We solicit as snare of public patronage.

B. A. FAHNESTOCK & CO., JAL SUDA-20 casks English for sale by marge B. A. FAHNESTOCK & CO. PETROLEUM OR ROCK OIL;

T is not more than one year ago since this great remdedy was brought before the public, for the relief and cure of disease. Its great powers to heal, have, since then, become fully appreciated by the community, and we allege that the longer it is tried the more certain will its great fame spread. It is not the remedy of a day, got up for the sole purpose of making money; but, one, which we conceive, will containe to be used when all nostrums have been forgotten. The PETROLEUM is a Natural Remedy, elaborated inthe depths of the earth by a power and agency that laughs to scorn all human competition. It is our duty, when we write about a medicine, that we write TRUTH—that we say nothing calculated to deceive those who may trust our word or put confidence in our statements. The sick are very apt to eatch at any thing that promises relief from discase. A story can hardity be too highly wrought to an awer the object of guilling or humburgging some of them. Now, we do not desire to do this; we are anxious only that the trath in relation to our Remedy should be told, in order to secure for it a reputation far exceeding any single article of the materia medica. Plain, unvariashed facts—facts that may be ascertained in our own city and neighborhood, hear ample teatmony in favor of the Petroleum. DOTATOES-100 bbls and 60 sacks for sale by

Second streat, between Wood and Smithfald.

O were called upon by Messrs. Lapt encot & Barr, to witness an honest and fair test of one on their Phonix Safes. The furnace being prepared, tac Safe was placed inside thereof, with books, papers and some money; when the door of the Safe was closed and the fire kindled at quarter past? o'clock, and in a short time the Safe was red ket, and continued till half past? o'clock, being about four and a half hours, when the committee expressed their sarisfaction that the time occupied with such heat was sufficient. The furnace was then pulled down, Safe cooled, and door opened—the books, papers and money safe. The heat was so great as to melt off the brass mountings. We therefore take pleasure in recommending these Safes to the public, as being, in our judgment, entirely fire proof.

The Faculties, for intellectual abilities, moral worth and professional acquirements, will compare favorably with the most distinguished in our country. The Medical Faculty constitutes an anomaly in this or any other country—all of them are able Lecturors and the best of Teachers.

Those who willcontemplate our geographical position, and the extent of our population, can have no doubtas to the eligibility of our situation for an onterprise of the kind. As to health, including all seasons of the year, wo deny that ony other city has more.

The Roofing.

The Roofing.

The subscribers take this method to inform property tholders, house-builders, and all others interested, that they still continue the business of Tin Roofing, in all its branches. Their skill and experience in this part of the business, bas hithertoe nonbled them to give enjire satisfaction. And they hope, that by containing the same policy of using the best materials, and employing skillful workmen, to keep up this favorable impression. If the question of Tin Roofing was new, or just brought before the notice of this community for the first time, we would consider that the importance of the subject would justify us in extending our views on its superior advantages. This, however, is not the case. We shall therefore, confine ourselves to a few remarks. On the 6th day of June, 1844, (nearly seven years ago) we finished our first job of Tin Roofing in this place. From that up to the present time, we have covered with iin the roofs of the finest and most costly buildings that have been erected in this county. We have given our views on a pravious occasion on the experior advantage of Tin over iron, as a covering for houses. And time, the egret tester of all things, has but too clearly proven the egret centess of our opinion.

Again, if we place Tin in juxta-position, with Sinte as a covering for houses, we think thattin will bear a favorable comparison, with some decided advantages.—These advantages are, that when this is used the roof can be made much flatter—thereby saving materials, in the length of rafers, brick in the gable ends—making the house easy of access in case of a fire, and showing a better finish and appearance. Also, when the is used the gatters are worked in, thereby saving the extra and reavy-expense for copper gutters, copper flashings, &c.,—hings indispensible on siate roofs. If duther reasons were deemed necessary, we could offer the experience of our castern cities in proof what has been advanced, as it is a well known Boats and Steam Boats, on rivers and lakes, on the most liberal terms.
