INCE the introduction of this new compound, Coughs
O and colds are cured in a very short time. We will
warrant Dr. Keyser's Pectoral Syrup to cure cases of
Coughs, Colds, Bronchitts, Laiguists, in less time and
at a cheaper rate than any other medicine ever discovered.

IT HAS AN ENTIRELY NEW ACTION—The old
Cough Medicines always sicken the stomach and produce nausea which ismore disagreeable than the Cough
lites! This is obviated in this mixture, for it is a pleasant soothing article and it will cure, or the money will.

It is the prescription of a regular physician, and has been used by him in his own practice for a number of years, with the most heroic success.

CONSUMPTION—A lady from Steubenville writes that the daughter had been afflicted with a Cough and expectoration, night sweats, hectic fever, and all the distressing symptoms of consumption, and that after that they doubtles she was entirely cured. A gentleman and Chronic Cough for eight years, has been entirely relieved and the cough removed by the use of half adornof bottles of the Pectoral Syrup. TO MARKET STEML ANNITAL SALE OF GENTLEMEN'S GOODS. GENTLEMEN'S FURNISHING STORE,
AND ODD-FELLOWS DEPOT,

EYO. 80.

APOLLO BUILDINGS, FOURTH STREET,
Sign of the Bee-Hive.

THE SUBSCHBERS have spened a Gentlemen's Furnishing Store, in connection with an Odd Fellows' Depot, in which are to be found a variety of Fancy Goods and Odd Fellows' Regalia, never before presented to a Pittsburgh public, by a single establishment.

From Philadelphia, they are in regular receipt of Odd Fellows' Registers, Lodge Blank Books, Gavelia, and other Lodge articles. The Regulia exhibited at their counter is most gorgeous and admirably assorted; nothing of the sort, so entirely exputitie, has ever been seen in this market in such profusion.

The Gentlemen's Furnishing Department is plentifully supplied with a variety of superb and delicately wrought articles of dress. The variety is entirely too great to enumerate in a moderate space; we must, therefore, direct the public to an investigation of the Stock itself. All that we can say in this connection is, that at our Establishment the gentlemen of taste can be supplied with any article in our line, manufactured out of the best materials and by the most experienced hands. We solicit an examination of our stock; it composes a variety which challe nges comparison.

A large lot of Fine Silk and Lines Skirts; Fancy Stocks and self adjusting Croomis; Gloves and Hostery of various kinds, and in fact every article of comfort or luxury which a gentlemen of good taste would fancy.

It is our duty, when we write about a medicine, that we write raturn—that we say nothing calculated to deceive those who may trust our word or put confidence in our statements. The sick are very apt to catch at any thing that promises relief from discase. A story can hardiv be too highly wrought to answer the object of guilling or humbugging some of them. Tin Roofing.

The subscribers take this method to inform property holders, house-builders, and all others interested, that they still continue the business of Tin Roofing, in all its branches. Their skill and experience in this part of the business, has hitherto enabled them to give entire satisfaction. And they hope, that by continuing the same policy of using the best materials, and employing skillful workmen. to keep up this favorable impression. If the question of Tin Roofing was new, or just brought before the notice of this community for the first time, we would consider that the importance of the subject would justify us in extending our views on its superior advantages. This, however, is not the case. We shall therefore, confine ourselves to a few remarks. On the fifth day of June, 1814, (nearly seven years ago.) we finished our first job of Tin Roofing in this place. From that up to the present time, we have ceytered with the two been rected in this county. We have given our views on a previous occasion on the superior advantage of Tin over iron, as a covering for houses. And time, the great tester of all things, has but too clearly proven the correctmess of our opinion.

Again, if we place Thin juxta-position, with Slate as a covering for houses, we think that in, will bear a favorable comparison, with some decided advantages.—These advantages are, that when this used the roof can be made much flatter—thereby saving materials, in the length of rafters, brick in the gable ends—making the house casy of accessin case of a fire, and showing a better finish and appearance. Also, when the is used the gutters are worked in, thereby saving materials, in the length of rafters, brick in the gable ends—making the house casy of accessin case of a fire, and showing a better finish and appearance. SALE OF VALUABLE

HON WORKS, NEGROES, MULES, &c.
IN pursaance of a decree of the Chancery Court in Dr. Prentie, in his famous treatise on "Food and Dict," published by Fowlers & Wells, New York, page 33 states the same great fact, and describes the method of preparation. There are few higher authorities than Dr. Pereira.

Dr. Comes, in his valuable writings on the "Physiology of Digestion," observes that "a diminution of the duquantity of the Gastric Juice is a prominent and all-prevailing cause of Dyspepsia;" and he states that "a distinguished professor of medicine in London, who was severely afficied with his complaint, finding everything else to fail, had recourse to the Gastric Juice, obtained from the stomach of living animals, which proved completely successful."

Dr. Garaiam, author of the famous works on "Vegetable Diet," says: "It is a remarkable fact in physiology that the stomachs of animals, macerated in water, impart to the fluid the property of dissolving various articles of food, and of effecting a kind of artificial digestion of them in no wise different from the natural digestive process,"

Dr. Shaon's great work, the "Chemistry of Man," (Leo & Blanchard, Phila., 1840, pp 321-2) says: "The discovery of PEPSIN forms a new era in the chemical history of Digestion. From recent experiments we know that food is dissolved as rapidly in an artificial digestive fluid, prepared from Pepsin, as it is in the natural Gastric Juice itself."

Professor DUNGLISON, of the Jefferson College, Phila., delphin, in his great work on Human Physiology, devotes more than fifty pages to an examination of this subject. His experiments with Dr. Beaumont, on the Gastric Juice, obtained from the living human stomach and from animals, are well known. "In ail cases," he says, "disgestion occurred as perfectly in the artificial digestive the most marvelous effects, curing cases of Debility, Emaciation, Nervous Decline, and Dyspeptic Consumption, supposed to be on the very verge of the grave. It is impossible to give the drialis of cases in the limits of this advertisement—but authenticated certificates have been given of heaper.
