From Philadelphia, they are in regular receipt of Odd Fellows' Regular, and other Lodge Stank Books, Garels, and other lodge startles. The Regular exhibited at their counter is most gorgeous and admirably assorted; nothing of the sort, remirely expusite, has ever been seen in this market in such profusion.
The Gentlemen's Furnishing Department is plentifully supplied with a variety of superb and delicately wrought stricles of dress. The variety is entirely too great to enumerate in a moderate space; we must therefore, direct the public to an investigation of the Stock itself. All that we can say in this connection is that at our Establishment the gentlemen of taste can be supplied with any article in our line, manufactured out of the best materials and by the most experienced lands. We solicit an examination of our stock; it composes avariety winch challenges comparison.

Second street, buttern Wood and Smithfield.

NTuesday afternoon, July 25, 1848, the undersigned were called upon by Messrs. Laptencott & Barr, to witness an honest and fair test of one or their Phonix Sales. The furnace being prepared, the Safe was placed inside thereof, with books, papers and some money; when the door of the Safe was closed and the fire kindled at a quarter past 2 o'clock, and in a short time the Safe was red hot, and continuedtill half past 6 o'clock, being about four and a half hours, when the committee expressed their satisfaction that the time occupied with such heat was sufficient. The furnace was then pulled down, Safe cooled, and door opened—the books, papers and money safe. The heat was so great as to melt off the brass mountings. We therefore take pleasure in recommending these Safes to the public, as being, in our judgment, entirely fire proof.

I thus become customary in the Atlantic cities for congregations to insure the lives of heir Pastors, and on Christmas or New Year's day to make the family a present of the policy. This is certainly an excellent way of showing their regard for their Minister, whose salary in very many cases is caractly equal to his immediate wants. To the man of family, at his death, it is a consolitule ones are thus provided for.

Churches turolved, would do well to insure the lives of one or-more of the trustees, at whose demise the amount would be applied to liquidate the debt.

The Roofing.

The Roofing of the property holders, house-builders, and all others interested that they still continue the business of Tin Roofing, in all its branches. Their skill and experience in this part of the business, has hitherto enabled them to give entire satisfaction. And they hope, that by continuing the same policy of using the best materials, and employing skillful workmen, to keep ap this favorable impression. If the question of Tin Roofing was new, or just brought before the notice of this community for the first time, we would consider that the importance of the subject would justify us in extending our views on its superior advantages. This, however, is not the case. We shall therefore, confine corselves to a few remarks. On the 6th day of June, 1844, (nearly seven years ago,) we finished our first job of Tin Roofing in this place. From that up to the present time, we have covered with tin the roofs of the finest and most costly buildings that have been erected in this county. We have given our views on a previous occasion on the superior advantage of Tin over iron, as a covering for houses. And time, the great tester of all things, has but too clearly proven the correctness of our opinion.

Again, if we place Tin in juxla-position, with Slate as a covering for houses, we think that tin will bear a favorable comparison, with some decided advantages.

These advantages are, that when this used the roof, can be made much flater—thereby saving materials, in the length of rafters, brick in the gubte ends—making the house casy of ancess in case of a fire, and showing a better finish and appearance. Also, when the is used the gutters are worked in, thereby saving the extra and heavy expense for copper gutters, copper flashings, &c.,—things indispensible on slate roofs. If further rensons were deemed necessary, we could offer the experience of our castern cities in proof what has been advanced, as it is a well known fact that New York and other eastern cities in proof what has been advan Faculty constitutes an anomaly in this or any other country—all of them are able Lecturers and the rost of Teachers.

These who will contemplate our geographical position, and the extent of our population, can have ne doubt as to the eligibility of our situation for an enterprise of the kind. As to health, including all seasons of the year, was deny that anyother city has more.

The first class of the Law and Medical Departments of this Institute were small, but the gentlemen composing them are takened and in the highest degree respectable—a favorable ome a for the future prosperity of the Institute. That the public may be satisfied of the permanendy of this school, we feel it our duty to state, that the Trustees and Faculty form a unit in action, which argues well for its future success; and that the peculiar internal organization which connects them, ca most be intercaped.
