The Devotional Family Bible. Mr. George Virtue, London and New York, is now publishing the Bible in numbers, at 25 cents each, to be complete in sixty-eight parts. It will contain 69 magnificent illustrations on steel, by the most eminent London artists. In our opinion it far surpasses Harper's Pictorial Bible, published a few years since, and when completed it will be the chespest and most beautiful Family Bible over published. THE MICHIGAN CONSPIRACY. A GANG OF VILLAINS BROKEN UP. The Detroit Daily Tribing of the 21st contains

e following: We briefly announced on Saturday the arrest o a gang of men in Jackson county, who were or ganized for the most nefarious purposes that de-pravity could suggest. Our readers will remember that for the last two years the Central Railroad Company have been constantly annoyed along their lins, by persons whose sole object seemed to be to placing obstructions on the Road, and otherwise destroying the property of the Company — At one time, so systematic had their work of destroying the property of the Company struction become, that the Railroad Company were induced to employ a couple of shrewd persons, whose duty it should be to travel along the line vere the band that for eighteen months they eluled the most persevering enquiries. Some four weeks ago one of the persons employed by the Company obtained an inkling of the organization, and by adroit management succeeded in wormin himself into the confidence of the initiated; bu efore they would trust him to any consideral extent, it was required as a proof of his allegi-ance, that he should fire the Depot at Niles on a ance, that he should lit was not previously done certain night, provided it was not previously done by an individual from this city, who was to be

sent on for that purpose. The night came, and to ward off suspicion or betrayal, as well as to se-cure the full confidence of the gang, the Depot was fired—all necessary precautions, however, hav-ing been made to avert any serious damage to the buildings. The news that the Depot at Niles had been set on fire, but fortunately discovered in time to prevent its destruction, at once gave to the new recruit the fullest confidence of the gang, and he was forthwith admitted to the most secret counsels of the leading desperadoes. Counterfeiting, horse stealing, incendiarism, burglary, robbery, and the smallest petty larceny, were the sworn objects of this monstrous organization. One of their designs was to blow up the track and car by an ingeniously contrived torpedo, so arranged as to be fired by the locomotive, such while the passenger cars should be over it. The informant continued to act with them until he had procured the names of thirty or forty of the and conspirators, and their places of residence, con-fined principally to Leons, Benter, Jackson, Michigan, and to this city. Before plans had been ma-tured for their arrest, the notorious Joe Dows-

quisition of the Governor of Pennsylvania, and the management of the gang devolved upon a fellow calling himself O. D. Williams, then in this city, but a resident of the State of New York. This person, it was ascertained, was to leave De-This person, it was ascertained to the person of the perso arrest at that time would be the signal for the general dispersion of his accomplices, it was dened to let him proceed, while an officer, fornished with the requisite papers, should accompany him, and make the arrest during the passage, thus giving time to perfect a capture of his companions in this State. That arrest was made by Wm. H. Goodenow, of the Custom House, who was acting as U. S. Marshal, and Williams was

In this city, Washington Gay and Erastus Smith were arrested on Saturday, and in the house of the former were found a variety of implements for burning buildings, and so constructed as to burn

one hour, or three days, before setting fire to the building. By one of these machines, it has been discovered that the Depot of this city was fired last fall, which resulted in the loss of one hundred thousand dollars worth of property. The manner of manufacturing this material, of which so great a variety of beautiful articles are made, is thus described by the New York Evening Post: The article obtains its name from the prepared post: The article obtains its name from the prepared paper which forms the principal material in its composition. This paper, which is cut into the required size and shape, is made of the consistency of the hardest wood by steeping in oil, after which it is left to dry in an oven. When the required time has elapsed, it is removed, and left in the open air for some minutes, when a cost of refused black varnish is laid over the surface. Before this varnish has beis laid over the surface. Before this varnish has become dry, pieces of pearls, cut in the form of leaves, roses and other flowers, as the fancy of the artist or the character of the article may require, are laid on the paper, to which they adhere, and which is again placed in the oven. When it has been removed the second time, another coat of varnish is applied on the surface of the pearl and paper indiscriminately. The varnish, when it has had sufficient time to dry, is scraped off the pearl, and the same process is repeated several times, until all parts of the surface is made quite even. This gives the pearl the appearance of having been inland. The article,

the surface is made quite even. This gives the pearl the appearance of having been inland. The article, which is still in an unfinished state, after a thorough polish, has to be submitted to the hands of the artist, upon whose skill its beauty in a great degree despends. Under his hands the piece of pearl, but roughly formed, is soon converted into a full blown flower, surrounded by its leaves and buds. The branches are first traced out with a camel's hair poncil, dipped, in size, upon which gold leaf is afterwards laid. Then follows the painting of the flowers and leaves, the colors of which are rendered almost indelible by the application of a second coat of refined white varnish. Persons who have seen appier mache articles have no doubt been struck papier mache articles have no doubt been struck with the natural appearance given to the leaves and flowers by the pearl, the brilliancy of which endures an incredible length of time.

The art of making an Arinicial Digestice Fluid, and of performing the process of Digestion, out of the Stomach, has long been known to Physiological Chemists. The honor of the discovery belongs to accelebrated German Chemist, who gave the name of Feynin to the active principle of the Gastric Juice, which he chiained by macerating the lining membrane of the Digestive Stomach of the Cali in water, and precipitating the Pepsin from the solution. Dr. Prout, Dr. Percira, and Dr. Gregory, in England; Dr. Beaumoniand Dr. Dunglison, in America; and chief of all, Baron Litzer, have recently experimented, and written upon this singularly interesting and curious subject, and thrown much light upon the nature of the Digestive process, in its chemical and physiological relations.

Was would not rather enjoy the pleasures of health and the agreeable consciousness of well-being to the grining pains of disease—the bitter continuance of ill-health, and the abilling thoughts of never recovering!

But, of all diseases, who is not most auxious to escape a disease of the Lungs! The very idea of failing a victim to Consumption, sends a tremor, to the heartstrings of life. But, oh! how joyous the thought that the antimeter and meature is all our own, when just hefore, Despair had spread her dark canvass over us.

Such, kind reader, are the pleasurable sensations experienced by hundreds, who, by the use of Dr. Wistar's Baisam of Wild Cherry, have this dire disease slowly but strely, driven from their system—and health, rosy health, again restored to their languishing bodies.

Beware of counterfeits and base imitations. Sarsaparilla cr. Canchalagua.

Sarsaparilla cr. Canchialagua.

Soon after the introduction of the herb Canchalagua into this country, it was found that as an anti-scorbuite, febriago, and tonic, it was found that as an anti-scorbuite, febriago, and tonic, it was far superior to the best Brazitian Sarsaparilla: in Liver Complaints, Scroftla, and Pulmonary affections, it was administered with marked success. The qualities we have named it retains in all their strength when combined with Liverwort and Int, in the form of Dr. Rogers Sgrup of Licerwort, Tar, and Canchalagua. The demand for this great anti-Consumptive medicine is enormous, and constantly increasing; a necessary result of its effects. The limits of an entire newspaper would be inadequate to present the evidence in its favor, which, without solicitation, has accumulated in our hands. For that, and other information we must refer the searcher after truth to the pamphlets distributed gratuitously by our Agents. See also long devertisement.
