THE MORNING POST has a larger circulation than any subscription paper published in Pittsburgh. To business men it alords an excellent medium for Advertising and being the only Democratic paper issued in Alleghenay, county, it goes into the hands of a class of readers reached by no other paper. Advertisers will be good enough to beer this in mind. New Dress for the Post.

Extremes of Fanaticism Last week the mad-caps of South Carolina met in solemn Convention, with the view of seceding from or dissolving the Union, because of the passage of the Compromise measure

through the late Congress. At the same moment the Abolition Disunioni were in session at Syracuse, N. Y., composed of Foster, and their ally in treason from the other side of the water, George Thompson. It is a curious fact, that these two extremes of crazy to seek to bring about the same result-a dissolu-

In other respects it is one of the best papers in the United States. If it would abandon the agitators and disunionists, we think harmony would be res--tored to our ranks once more in the Empire City.

At present there oppears to be no prospect of s renewal of the war between the Gazette and Journal of this city. The latter paper having gained a decided rictory, now reposes upon his laurels like a conquerer just returned from the battle field. It certainly must be mortifying to the pride of the editor of "the oldest paper West of the Mountains," to be compelled to acknowledge that he is too weak to hold a controversy with such a political tyro as Ro-BERT M. Ridder. We think it is about time that a council of the "fifteen" would assemble to take inmore vitality to the "Old Gazette."

FOREIGN MISCELLANY.

[Translated Expressly for the Morning Post.] Parts. The papers have already spoken of the candalous narrative of the pretended Consul Gencral of New Granads, who was detected in cheating at cards. I have received some additional details from one of his victims. I must first reinte the excitement into which the diplomatic Corps were thrown, when it was suddenly announced that one their number had been discovered to be a sharpor! In all the official headquarters reigned the vildest agitation. Zealous inquiry was made; not or the guilty person, but for the explanation of this evident misunderstanding. In the evening, at a

soiree in the residence of the Prussian Minister, the true state of the case was made known. A Creole, falsely distinguished by a title, was the person fixed upon. KALISCH, April 5th. A great number of arrests have lately been made, throughout the kingdom of Poland, and more particularly in Warsaw, of persons suspected of having been connected with a secret conspiracy against Government. Among the accused are many priests and literary men, all of whom have been confined in the citadel at Warsaw. So excessively sovere are the arbitrary measures by which the nationality of Poland has lately been oppressed, that they are recalling to life a feeling of esistance in political matters, to which this popula-tion had long been dead. Thus, the very terrors which tyrons are compolled to use, are the surest means of their own ruin.—German papers.

PROM CALIFORNIA. Trade-Contradictory Reports and their Cause erce of the Pacific-Col. The Gold Mines __ C Fremont—California Legislature—Indian Trou-bles—Murders in Meriposu Mines—The Weather -The Markets, &c., &c.

[Correspondence of the Morning Post.] STOCKTON CITY, March 25, 1851. DEAR SIR :- By the politoness of Michael Kane, , I send you the latest news in this section of California. Nothing important has transpired here since my last. Trade begins to assume a little more brisk appearance, as the winter stock of goods in the mines is nearly exhausted, and miners have settled down on the rivers for summer's work. It may be surprising to you in the Atlantic States, o see so many contradictory reports of the success

of mining operations here, but to us it is not so, as it is plain how they originate. Men write from here accordingly as they are more or less successful; some who have just arrived in the country, and know nothing only from reports, write, on the strength of them, without even seeing the mines, or nandling a pick and shovel to get a practical know- night, during a period of fifty years. She must have ledge of their richness, while others go there with high anticipations of making a momentary fortune without labor, but when they see the immense piles April, of which 13 were by consumption. The white of clay and gravel thrown up, and then often finding but little gold, they return to the cities in diegust, o write reports to their friends, which you can imgine the substance of. But the truth is this; Any hard laboring man can go into the mines, and if not overtaken by sickness and works steady, satisfied for Rio de Janeiro. with what he gets, can make on an average three or

four dollars per day, with the chance of striking something rich; but not more than one fourth of the fact. The crops at the Bahamas were suffering very miners pursue this course. They are not satisfied greatly for want of rain. The yield of sait will be ver with making four or five dollars, or sometimes ten

out this summer and winter, and for another year the shipment of gold will be large, but after this it will gradually diminish, until the California mines roduce but little more than other mining countries. It now requires, in most of cases, lour times the amount of labor to get a less quantity of gold than formerly, and by another year, with the increased facilities for washing, the favorable season, and the incurred in wearing, the lavorable season, and the immense amount of persons engaged in mining, all the placers that can be worked with the least labor and most profit will be worked over, and alterwards descrited as giving too much labor and too little gold to be profitable. It is true, the gold mines of Calisfornia are liganustible, but it will take capital to work with exceess, and it will affect only a tolerable profit. Those, then, who are afraid that the California mines are rather to find the work with second and the west.

nia mines are going to flood the world with their treasure, and make it valueless, need not be alarmed. The immense amount of dust she has shipped these few years has served to stimulate commerce, and fornish a reliable basis for its more effected and furnish a reliable basis for its more estended operations. How would the want of more specio been felt if the immense trade which has recomily sprung up in the Pacific hast taken place (which it must have done in a few years) without the gold of California, especially with nations who know nothing of paper currency, drafts or bills of exchange? Before this era, the want of more specie was severed. ly felt, especially in the Atlantic States, and when the balance of trade was largely against them; but now the vacuum has been filled, and the mines of California, as far as individual labor is concerned

onhauted, but furnishing yearly a considerably less return of gold to the operations of capital.

Col. Fremont passed through here, a few days since, with a number of miners, to his claim on the Meripoga. He has written an address to his constituenta here, defending his course in the United States Senate on the Land Title and Miners Tax The Legislature are progressing slowly, reform

ing the laws which were passed in hate the last session. A bill has passed the Senate, and will probably pass the House, making grand larceny a capital offence. Such a bill as this, and rigidly enforced, is demanded by the unsettled state of society bere. [IP ARTICLL DIOESTION I—Dr. Houghton's Pennin, the True Digestics Fluid, or Gaurie Inica, a great Dyspopsia Curer, prepared from Rennet, or the Fourth Stomach of the Ox. after directions of Hestor Liesate, by J. S. Houghton, M. D., Philadelphia, Pa.

The art of making an Articlar Digestics Fluid, and of performing the process of Digestion, out of the Stomach, has long been known to Physiological Chemists. The honor of the discovery belongs to a celebrated Gorman Chemist, who gave the name of Penin to the active prociple of the Gastric Juice, which he obtained by mucerating the lining membrane of the Digestive Stomach of the Call in water, and precipitating the Penin from the solution. Dr. Prout, Dr. Percira, and Dr. Gregory, in England Dr. Beaumonthand Dr. Dugglison, in America; and chief of all, Baron Liesue, have recently experimented, and written upon this singularly interesting and curious subject, and thrown much light upon the mature of the Digestive process, in its chemical and physiological religions.
