11. Hints to Parenta.—One great source of disease in children is the unbealthiness of parents! It would be just as reasonable to expect a rich crop from a barren soil, as that strong and healthy children should be born of parents whose constitutions have been worn out with intemperance and disease. A sickly frame may be originally induced by hardships, accidents, or intemperance, but chiefly by the latter. It is impossible that a course of vice or imprudence should not spoil the best constitution; and did the evil terminate here, it would be a just punishment for the folly of the transgressor. But not so. For, when once a disease is contracted, and through neglect in applying the proper means it becomes rivited in the habit, it is then entailed upon-posterity.—Female consultations are as capable of improvement as family estates—and ye who would wish to improve not only your own health, but that of your own offspring, by eradicating the many distressing diseases that are entailed through neglect or imprudence, lose no time in purifying the blood and cleansing the system. Married persons, and those about to be married, should not fail to purify their blood, for how many diseases it are transmitted to posterity. How often do we see Scalds. Scrodia and a thousand other afflictions, transmitted to the rising generation; that might have been prevented by this time y precaution? To accomplish which, there is nothing before the public, or the whole world, so effectful as Dr BULL'S LATEST IMPROVED FLUID EXTRACT OF SARSAPARILLA; combining Yellow Dock and Burdock, with the pure and genuine Honduras Sarsaparilla. For general debility during this warm weather, it acts like a charm, restoring elasticity of miscle and vigor, with sprightliness of intellect.
