SCIENTIFIC EYIDENCE!

Baron Liming in his celebrated work on Animal Chemistry, says: "An artilleial Digestive Fluid, analogous te the Gastric Juliee, may be readily prepared from the marrious articles of food, as meat and eggs, will be so softened, changed and digested, just in the same manner as they would be in the human stomach."

Dr. Pentira, in his famous treatise on "Food and Dict,"published by Fowlers & Wells, New York, page 25-states the same great fact, and describes the method of preparation. There are few higher authorities than Dr. Perira.

Dr. Comb. in his valuable writings on the "Physiology of Digestion," observes that "a adminution of the duquantity of the Gastric Julice is a prominent and all-prevailing cause of Dyspepsia;" and he states that "d distinguished professor of medicine in London, who was seyerly afflicted with this complaint, finding everything, else to full, had recourse to the Gastric Julice, obtained from the stomach of living animals, which proved completely successful."

Dr. Gaaham, author of the famous works on "Vegetable Diet," says: "It is a remarkable fact in physiology that the stomachs of niminals, macerated in water, impart to the fluid the property of dissolving various articles of food, and of effecting a kind of artificial digestive form the them in no wice different from the natural lilgest ive process."

Dr. Simor's great work, the "Chemistry of Man," (Les & Blanchard, Phila., 1846, pp. 321-2) says: "The discovery of PEPSIN forms a new era in the chemical history of Digestion. From recent experiments we know that food is dissolved as rapidly in an artificial digestive fluid, prepared from Pepsin, as it is in the natural Gastrie Juice itself."

Professor Dunglison, of the Jefferson College, Philadelphia, in his great work on Human Physiology devotes more than fifty pages to an examination of this subject. His experiments with Dr. Beaumont, on the Gastrie Juice, obtained from the living human stomach and from animals, are well known. "In all cases." he says, "disgestion occurred as perfectly in the artificial as in the natural digestions."

Dr. Housitton's preparation of PEPSIN has produced nies.

N. H. HACKE. relation to one of the most important Remealize of modern times?

PETROLEUM OR ROCK OIL;

It is not more than one year ago since this great remailed by was brought before the public, for the relief and cure of discase. Its great powers to heal, have, since then, become fully appreciated by the community, and we allege that the longer it is tried the more certain will its great fame spread. It is not the remedy of a day; got up for the sole purpose of making money; but, one, which we conceive, will containe to be used when all nostrums have been forgotten. The PETROLEUM is a Natural Remedy, elaborated in the depths of the earth by a power and agency that laughs, to seom all human competition. It is our duty, when we write about a medicine, that we write TRUTH—that we say nothing calculated to deceive those who may trust our word or put confidence in our statements. The eich are very apt to catch at any thing that promises relief from discussed. A story can hardiy be too highly wrought to answer the object of gulling or humbugging some of them. Now, we do not desire to do this; we are anxious only that the truth in relation to our Remedy should be told, in order to secure for it a reputation far exceeding any single article of the materia medica. Plain, unwarmished facts—facts that may be ascertained in our own city zens, who were totally blind, have been restored to sight. Several cases to blindness, in the State of Ohio, have been cured.
