COL BIGLER AND THE STATE DEBT.

FACTS WHICH CANNOT BE CONTROVERTED.

The following communication comes to us from the highest source. The writer is a gentlema who commands alike the respect and confidence of both Whigs and Democrats. He states facts in regard to the State Debt, and the career of Col. BIOLER in the Legislature, which cannot be controverted by the friends of Gov. Johnston:

An article which appeared in the Pittsburgh Gazette of the 12th inst., on the subject of the State debt, and which is taken from the Reading Journal, is calculated, if not designed, to make an erroneous impression upon the public mind, and to do injustice to the late Gov. Shunk. It in substance asserts that during his administration, the debt was increased \$4,786,528 60. The author of this article must have been ignorant of the facts, or must have wilfully perverted them. To correct his errors and to present the truth of the matter, is my object in appearing before

The State first failed to pay the interest on the debt, on the first day of August, 1842, and continued delinquent till the first day of February 1845. During that period, the Legislature authorized the issuing of certificates to the holders of the State stock, for the interest, as it became payable semi-annually. On the 16th April, 1845, provision was made in the annual appropriation bill, authorizing the Governor, upon the surren der of those certificates to the Auditor General to cause certificates of State stock to be issued in lieu thereof, at an interest of five per cent per annum, redeemable on and after the first day of find in the last number of the Fulton Demo August, 1855. The holders of the certificates crat: for the interest, availed themselves of this provision, and as certificates had been issued for Bedford and Somerset counties. \$800,000 00 each, the aggregate of them amoun-The law further provided, that interest on those certificates should be computed from the time they were issued at the rate of 41 per cent. This interest, added to the principal, made the amount of \$4,555,182 15, the same which is charged in the article in question, under the head of ("Stock Loan, April 16, 1845,") as part of the debt created during Gov. Shunk's term. For the act cited, see Pamphlet Laws of 1845, page

Comment on this subject I deem unnecessary The simple statement of the facts is sufficient to escape the falsity of the charge, and to show that this item of the debt had occurred before Gov. Shunk was inducted into office, and that consequently he had nothing to do with its creation. The effect of the enactment of the 16th April, 1845, was simply to change the form of

Much ado is made by certain presses, in the interest of Gov. Johnston, about the credit which is due to him, for the payment of the interest of the State debt. One would suppose, that to him, and to him alone, belongs all the credit, and all the honor of paying the interest, and that it was not till his elevation to the Chief Magistracy that it to our readers in full. it was paid. A more perfectly absurd and unfounded claim was never set up for any public man. The honor of redeeming the credit of the State belongs to the Legislature of 1844. That body, by passing an act authorizing the levying of a tax of three mills on the dollar for State purposes, provided the ways and means of paying the interest. The first payment after the suspension in 1842, was made on the first day of Pebruary, 1845, a few weeks after Governor Shunk was inaugurated, and it has been regularly continued up to the present period. For this Governor Johnston is entitled to no more credit, than any other gentleman who was in private life at the time that important message was adopted. Certainly, he is not entitled to as much credit as Col. Bigler, who was then Speaker of the Senate, and who, as the journals of that body will show, sustained the provision

for the three mill tax, upon every vote that was taken upon it. A brief history of the passage of this provision may not be uninteresting at this time. Whilst the bill for the sale of the public works, was be fore the House, an amendment was incorporated providing for the assessment of a tax of three mills on the dollar upon certain property enumerated, and the bill in that shape finally passed. The word "three," in this amendment was stricken out in the Senate, and the word "two" inserted, thus making it read two mills,-Col. Bigler voting against striking out and inserting. Upon the question of the final passage of the bill thus amended, Col. Bigler and other Senators, who were in favor of the three mill tax, voted in the negative, and the bill was lost. This vote was reconsidered, the House provision restored, and the bill finally passed by a vote of 16 | place: to 15. Col. Bigler's name is to be found in the affirmative. (Senate Journal 1844, page 829.) the name of B—n, an American, a Mormon, and a prophet. He is one of the most polite and It would not, perhaps, be unreasonable to claim pleasant men that I have met since I left home that I have met since I left home for Col. Bigler the honor of passing this great measure, as being the last member, who voted, it was in his power to decide the question, either in the affirmative or the negative. The Bill was afterwards referred to a committee of conference upon disagreeing votes of the two houses upon other provisions. The report of the committee ws adopted in the Senate, by a vote of 20 to 18, Col. Bigler again voting in the affirmative. Now, when it is remembered, that at the time this Bill was passed; the financial affairs of the State and the country were greatly deranged that money was scarce; that the credit of the State was so low that her stocks were at about forty dollars; that the debt, in consequence of her failing to pay the interest, was increasing at the rate of about two millions of dollars a year; that the opinion was prevalent that the people yould not submit to an increase of taxation and that the question of repudiation was enter tained, at least, by a portion of the community it will be admitted, that it required some degree of firmness and moral courage in the Represen tatives of the people, to meet the crisis. It was emphatically a crisis in the history of this good old Commonwealth. For nearly three years she to which her faith and her credit had been sol-

Steam on the New York Canal. The Albany papers describe the performance of a steam tug—the Jacob Hinds—which is the nvention of a Mr. G. Parker, and intended for owing on the canal. She has 75 feet beam, draws 21 feet water, and is propelled by an engine of 50 horse power. The wheel is in the entre of the boat, is 19 feet in diameter, 6 feet face and 2 feet dip. The buckets are of iron, and saucer shaped, thereby throwing the water into a narrow channel, through a groove in the bottom of the boat. There is no more swell

caused by this motion than is produced by any other boat of the same size moving at the same speed. Her movement on the experimental trip was at the rate of five miles an hour. It is pro posed to tow 75 ton boats at the rate of three miles an hour. The manufacturers guarantee that the engine will perform this amount of labor, for 24 hours, with two tons of coal. There is no limit, hardly, to the speed at which this press will work; its exactness is beyond anything known in this line of machinery; and what is better than all, Mr. F. says he can put up the largest size press at a cost of not more than \$500. Mr. Foreman is a practical printer, and at present a citizen of New Boston, Ill. In 1849 he had charge of the Herald, in this place, for a few weeks. We have no doubt that his "fortune" is now made, and we are sincerely rejoiced at it.
