**ID** Hints to Parents. - One great source of lisease in children is the unkealthiness of parents! It would be just as reasonable to expect a rich crop from barren soil, as that strong and healthy children should a barren soil, as that strong and heatity children should-be born of parents whose constitutions have been worn. out with intemperance and disease. A sickly frame may-be originally induced by hardships, accidents, or intem-perance, but chiefly by the latter. It is impossible that n course of vice or imprudence should not spoil the best constitution; and did the evil terminate here, it would be ajust punishment for the folly of the transgressor. But not so. For when once a disease is contracted, and through neglect in applying the proper means it becomes not so. For when once a discase is contracted, and through neglect in applying the proper means it becomes rivited in the habit, it is then entuiled upon postority.— Female constitutions are as capable of improvement as family estates—and ye who would wish to improve, not only your own health, but that of your own offspring, by eradicating the many distressing diseases that are entail-ed through neglect or improdence, lose no time in puri-fying the blood and cleansing the system. Married per-sons, and those about to be married, should not fall to purify their blood, for how many diseases are transmit-ed to posterity. How often do we see Scalls.
