These LURIAL Casts are composed of various kinds of actais, but principally of tron.

They are thoroughly enameled inside and out, and thus made impervious to air and indestructible. They are highly ornamental, and of a classic form, are light and portable, while they combine the greatest strength which metal is expuble of, in a given quantity.

When properly secured with cement they are perfectly air tight, and free from exhalation of offensive gases. They cost no more than good wooden coffinal, and are better than any other article in use, (of whatever cost.) for transportation, vaults, or ordinary interments, as has been proven by actual experiments, and certified to by some of our most scientific men; also, by the Honorables Henry Clay, Daniel Webster, Lewis Cass, and other distinguished Senators who have witnessed their merits, and whose letters, together with other evidences of their worth, may be seen at our Agents' Burial Case Depot, No. 374 Main street, three doors above Ninth, where we intend to keep on hand at all times, such a stock of all sizes and degrees of ornament and anish as will suit the uncat diversified tastos.

We invite the attention of the public, and of undertakers particularly throughout the west, to an examination of the article, and request them not to rely upon the representations of undertakers not using the article, whose interest it would be to misrepresent them.
