Artificial Leather.
A correspondent of the New York Advertiser who has recently visited Abington, Mass., in forms us that on going into a shop a few days ago, he witnessed another triumph of art alded and guided by science. A steam engine of six or eight horse power is erected for grinding up the chips and shavings of leather, which are out off by the boot and shoe makers, and which have heretofore been burned or thrown away. These are ground to a powder resembling course sanif, and this powder is then mixed with certain guns and other substances, so thoroughly that the whole mass becomes a kind of melitol leather.— I a sphort time this dries a little, and is rolled is said to be entirely water proc. On putting the question whether it was strong; the manu-r-faturer cut several strips a foot long and half an lach wide, which our informant endeavored in vain to break.

ber next, at private sale, it will then be offered al public outery, ou the premises. Terms at sale. JOHN FLEMING, <u>Aull:a</u><u>Agent for Johnston & Stockton:</u> <u>Notice to Contractors</u> <u>STEUBEN VILLE AND INDIANA RAILROAD</u> <u>Horosals will be received by the Staubenville und</u> indiana Raitroad Company in Steulenville, und! the lat day of October next, for the Grading and Masonry of the first division of the road extending from Steulenville to the Constant valley; and, also, for the construction of the entire Road between Steubenville and Coshocton and, also distinct proposals for the construction art the first hord of the steubenville and Coshocton to New-ark in vain to break. This new fashioned leather will make good middle soles for shoes, and perhaps inner soles; and would be very durable around the shafts of a carriage, or in any place where mere chafing is all the wear desired. It is supposed it would

wear well as bands for some kinds of machinery, and will doubtless be used for many other pur-poses. A patent has been secured and the arti-els will way have been secured and the artiark. The entire length of this line is about 110 miles, and cle will soon be in the market and in use.

The entire length of this line is about 110 miles, and it contains work of all descriptions in great variety, some of which is quilt heavy. Proposals will be received for the Grading and Ma sony of the first division entire or in sections of about a mile each, the Company reserving the privilege to make such disposition of the whole work as may ap-plear most conducive to its interests. Plans Profiles and Specifications can be seen at the Office of the Company, after the 15th of September and further information may be obtained on application to J Bickensdetter, Jr., Chief Engineer, or to the under-signed. Jy18:2md& W A SCENE AMONG THE BROKERS. - The Boston Post relates the following story-which, of course can have no application to any of the
