THE ABOLITION TRAGEDY.

A day or two since, we gave an account . sf horrid butchery of two most respectable and e timable farmers of Baltimore county, (Mes Bra GORSUCH,) who had visited our State for the pur pose of reclaiming some fugitives, who they had a right to pursue and reclaim under the supreme law of the land. All the accounts f rom the scene, go to prove that the movement: of these gentlemen were watched, from the moment they left Philadelphia, (from whence they laad gone to the place where the runaways weste, and that information had been given to the negroes of the designs, and the immediate presence in the neighborhood, of the pursuing party. This led to much inquiry on the part of the negroes of the vicinity, as to the proper course to be pursued; and the advice given to them by creatures calling themselves men, and who are living under the protection of the laws, was, that they should resist to the utmost any at tempts to take those men. Such advice as this, coming from those who are permitted to share in the blessings, and take a part in the management of the government, was of course enough and we find, accordingly, that the negroes armed themselves, and proceeded to the immediate v. cealed. disease in children is the unhealthiness of parents! It would be just as reasonable to expect a rich crop from a barren soil, as that strong and healthy children should be born of parents whose constitutions have been worn out with intemperance and disease. A sickly frame may not with intemperance and disease. would be just as reasonable to expect a rich crop from a barren soil, as that strong and healthy children should be born of parents whose constitutions have been worn out with intemperance and disease. A sickly frame may be originally induced by hardships, accidents, or intemperance, but chiefly by the latter. It is impossible that a course of vice or impredence should not spoil the best constitution; and did the evil terminate here, it would be a just punishment for the folly of the transgressor. But not so. For when once a disease is contracted, and through neglect in applying the proper means it becomes rivited in the habit, it is then entailed upon posterity. Female constitutions are as apable of improvement as family estates—and ye who would wish to improve, not only your own health, but that of your own offspring, by eradicating the many distressing diseases that are entailed through neglect or impradence, lose no time in purifying the blood and cleansing the system. Married persons, and those about to be married, should not fail to purify their blood, for how many diseases are transmitted to posterity. How often do we see Scalds, Scraftle and a thousand other afflictions, transmitted to the rising generation, that might have been prevented by this time-ty precaution? To accomplish which, there is nothing before the public, or the whole world, so effectual as Dr. BULL'S LATEST IMPROVED FLUID EXTRACT OF SARSAPARILLA, combining Yellow Dock and Burdock, with the pure and genuine Honduras Sarsaparilla. For general dability during this warm weather; it acts like a charm, restoring cleaturity of muscle and vigor with sprightness of intellect.
