Manufacturers of Improved Fire Proof Safes,

Second street, between Wood and Smithfield.

ON Tuesday afternoon, July 22, 1848, the undersigned had the satisfaction of witnessing an experiment & Barr, to test the value of their Patent Fire Proof Safes. The furnace being prepared, the Safe was placed inside the furnace, and the doors and some money when the door of the Safe was closed, and the fire kindled as quarter past 8 o'clock, and in a short time the Safe was red hot, and continued thus for the space of one hour and a half hours, when the committee expressed their satisfaction that the time accepted with such heat as they had applied, the contents would be found safe, sufficiently cooled, and door opened—the books, papers and money were found safe, the time was set to melt off the brass mountings. We therefore take pleasure in recommending these Safes to the public, as being, in our judgment, entirely fire proof.

WM. KAYE.

I am engaged in the foundry business, and know something about furnaces and heat. I witnessed the burning of the above safe, and can freely say there was no humbug about it, and with pleasure recommend them to the public as being, in my judgment, entirely fireproof. WM. KAYE.

In calling upon the above gentlemen for their signatures, they spoke in the highest terms of the fairness of the test, and their full confidence of the Safe's being fire proof. WM. KAYE.
