On the topsail yard the men were straining every nerve to furl the sail. The yard arms were rolled in; and the gaskets half passed, when a reshing noise like the escape of pent-up steam, arrested our attention; and turning our eyes in the direction from which it came, we beheld, not a mile astern of us, the whole surface of the water converted into a mass of boiling, driving foam, by the hoarse breath of the coming tornas. do. Thus yelled the excited captain; and in came the men off the yard, and down to the deak by the back stays—and the last man had just cleared the rigging, when the hurricane burst upon the ship in all its wild yelling fury. I said the last man had phined the deck—I did not mean ber 29. They were tested by the committee last man had gained the deck.—I did not mean that; for there was one who heeded not the captain's warning, and still remained on the yard. That one was Manuel, the noble looking Portugues sailor, the friend of the boy Diego.

The senior of the Gazette published an article vesterday in which he evinced a degree of conlecension towards the Democratic party, that we never considered the honorable gentleman capable of feeling, much less of expressing. We inveno hesitation to take the responsibility to thank him in the name of the whole democratic party, for the kind intimation that he is willing to permit us to come to his views of a Tariff, and to support what he thinks is right. There was, however, a drawback to the pleasure that should naturally arise from a perusal of any article that he might write, as it is a well established fact that they are all extremely laughable but we could not laugh at his last one. He says that our remarks are "balderdash and insult, altogether unworthy of criticism or reply," and goes on to write a half a column about them,

" A very good specimen on the whole, Of the figure of speech called rigmarole. Just listen to him:

"We were willing, (what condescention!) that they should have all the party capital that could be made out of it, if they would only help us to restore that system which would again cause the hum of cheerful and well-requited industry to salute our ears. We appealed to (How ungrate-ful we have been not to attend to the appeal of for President. The writer says: ful we have been not to attend to the appear of the Gazette) that party and to its presses in this behalf, and the only response we have yet re-ceived is a long article in the Post of yesterday, made up of balderdash and insult, altogether unworthy of either criticism or reply." "Boy Diego!" yelled the excited mate; well mitting it to the test of experience.

It has not the imprudence to say that the democratic party ever "throttled the Tariff," or that it had ever "placed the knife to the throat of Protection;" but of both these sins it has accused HENNY CLAY, the Father of the Tariff, and the man who for the last twentyfive years has been considered sufficiently great by those for whom the Gazette works, to be called the embodiment of all they know and all they

think they ought to do. The Gazette dare not accuse us with being half as bitter against a Tariff, as it has time and When I pinnted the two patches, I expected the product would be about like. "A fact came to our knowledge yesterday, which strikingly sets forth the ruinous effects of our present policy. Several thousands of bushels of wheat have been purchased recently in Clarion county, at fifty cents per bushet, and shipped by flat boot, to this city. Under the tariff of 1842, while all the furnaces were in full blast, the farmers of that region sold all their surplus wheat at their own graneries, at one dollar per bushel, and other grains in proportion. But now most of the furnaces are idle, the busy nulation that clustered round them is scatter ed, and the farmers have lost their market. In fact, while the iron business was brisk and pros-perous, thousands of barrels of flour were auually shipped from this city to Clarion county. the demand there being much greater than th home supply. This is one simple fact among hundreds of others, which plead powerfully for

That is, they want them to return to the times of '42, when they had to import their breadstaffs from Pittsburgh, and stop this system of developing the benefits of agricultural industry in that section of the state, as it interferes in a serious manner, with the interferes in a serious manner, with the interferes of the speculators, who, in former times, had such a fine chance to skin the people, by importing what they could not produce.
