on Friday evening last, to the workmen employel in it and a number of friends, an account of which we were compelled to omit in Monday's in an interesting address. After some introductory remarks, he said that "the limited business of manufacturing flour in the vicinity of this city has not afforded sufficient guaranty to the mechanic for keeping up with the improvements in other places, in the various patterns and inanew, and thus every portion of this extensive bir last."

mill, Mr. Wilmarth added that "the firm of Jenks, Painter & Co., machinists, made the pat terns from the drafts, and have furnished the machinery, most of which is of light character, to the amount of nearly 70,000 pounds-15,000 pounds of which is of wrought iron and steel. The mill-stones, smut machines and boltingcloths are from the well-known factory of W. W. Wallace. The engines now in use having been repaired or somewhat changed, were run in the former mill, and built under the supervision of Mr. John Wallace. We have been largely indebted to Mr. D. M. Evans, of Allegheny City, for his unceasing and indefatigable exertions in (superintending the carpenter and brick work.' Mr. W. paid the following well deserved compliment to the Millwright :

"Themaster spirit who planned, drew up, con- at the dwelling of Absalom Morris, No. 167, trived, and direc menting on his qualities as a mechanic, a draughts-man, and a man. His work shows for itself, per-facted in all its parts. The capacity of its pro-duction, if stated, would expose us to the charge

of braggarts by many. We trust that his sci ence and skill will not go unrewarded." Mr. Wilmarth stated that the real estate, im provements in buildings, machinery, engineers, &c., cost, in all, \$40,000. He expects the mill. a part of the season.
