We mentioned, the other day, from a private source of information, that the friends of Kossuth have taken a house for him in Kensington suth have taken a house for him in Reusington, and that he expected to take possession of it on the 1st of May. It was his intention, with about forty of his countrymen, to reside temporarily in Belgium, and there quietly to watch the progress of events in Europe. The sole reason why Kossuth would have preferred Belgium to England was the greater economy which was practicable in the former country. The al-tered state of affairs in France has, however, satisfied the illustrious Hungarian that the Bolgian government would not sanction his resi-dence in Belgium at present; and, therefore, he has fixed on England as the place of his resinas uxed on England as the place of his resi-dence for a season. His course of procedure, we learn from one of his most intimate friends, will be to assume a passive attitude for the pres-ent, in the assured belief that events are rapidly hurrying onwards to a great crisis both in Ger-many and Italy. Then will be the time for Hungary's redemption—towards which consumma-tion he expects no inconsiderable aid from the 40,000 muskets which the Americans have fur-nished him with. But better still—he has assurances, about which there can be no mistake, that though the United States have not formally romised to interfere on behalf of the Magyars, n any future struggle in which they may engage ith Anstria, yet that America will interfere, hould Russia, or any other despecome to the aid of Austria, with a view of put-ting down the Magyars.—London Advertiser. THE NEOBO RACE.—Bayard Taylor, writing from Nubia, in Upper Egypt, says:-"Those

friends of the African race, who point to Egypt as a proof of what that race has accomplished, are wholly mistaken. The only Negro features represented in Egyptian sculpture are those of slaves and captives taken in the Ethiopian wars of the Pharonhs. The temples and pyramids throughout Nubia, as far as the Darfur and Abyssinia, all bear the hieroglyphs of the monarchs, and there is no evidence in all the valley of the Nile that the Negro race ever attained a higher degree of civilization than is at present exhibited in Congo and Ashantee. I mention this, not from any feeling hostile to that race, but simply to controvert an opinion very prevalent in some parts of the United States."

As the disease advances the Cough becomes much more frequent, and is attended with the expectoration of matter, which is sometimes colorless, but at others, assumes a yellowish or greenish hue, and will often be found mixed with streaks of blood. After the Cough has continued for a time, the patient will experience some difficulty in breathing, accompanied, per haps, with a pain in the chest, and frequently, in one or both sides. The patient will be subject to a heetic fever and alternate flushes of heat, frequent cold chills, and often with copious night sweats. often with coplous night aweats.

A. A. CARRIER, Actuary,
nov12 Branch Office, 54 Smithfield st., Pittsburgh A Most Remarkable Case of Total Blindness Cured by Petroleum.—We juvi the attention of the afflicted and the public generally the certificate of William Hall, of this city. The ca

lation to the facts there set forth.

A I had been afflicted several years with a soreness of both eyes, which continued to increase until last September, (1850), the inflammation at that time having involved the whole lining membrane of both eyes, and ended in the deposite of a thick film, which wholly destroyed my sight. I had an operation performed, and the thickening removed, which soon returned and left me in as bad a condition as before. At this stage of the complaint I made application to several of the most eminent medical men, who informed me that "my eyes would never get well." At this time I could not distinguish any object. By the advice of some friends I commenced the use of the Petroleum, both internally and locally, under which my eyes have improved daily until the present time, and I have recovered my sight eithrely. My general health was very much improved by the Petroleum, and I attribute the restoration of my sight to its use. I reside at No. 102 Second street, in this city, and will be happy to give any information in relation to my case.

RELOW FIFTH, PHILADELPHIA.

A faithful portrait of a friend gives us pleasure, even while he is living, though absent; but when he is parted from us by death, its value is incalculable. We have every facility for taking Daguerrectypes of the largest size produced in this country. And for our ability to produce such, as are at least, unsurpassed, we would appeal to twelve Prizes awarded us at the Great Fairs—to attestations of living Artists—and to the Public Voice, confirming both by a patronage amounting to nearly 50, 200 Pictures.

We would respectfully solicit a visit from all (whether deciding pictures or not) at our Gallery, 140 Chesmut st., whether our strictest personal attention will be given.—Pictures at all prices, and put up in every style either for Case or Frame. Instruction given in the Art, and Instruments of the best quality, for sale. Also, for sale, Rights of taking "Crayon," Pictures.
