A WONDERFUL CIDER PRESS

The Harbinger Union notices a new cider press recently invented by a gentleman...

This machine consists of two cylinders of about six inches in diameter and fourteen inches in length...

The advantage of this machine, that it can be carried about anywhere, and used in the house, in the cellar, in the wash house, barn, or out of doors...

But in addition to this, by the removal of the spiral cylinder and the substitution of another that is furnished with the machine...

This is decidedly one of the greatest machines ever invented, and the inventor may realize a fortune from it.

For more information, write to the inventor, Mr. J. H. Wood, 1822 E. 10th St., Pittsburgh, Pa.

Massachusetts: A. H. P. Wood, 1822 E. 10th St., Pittsburgh, Pa.

From present indications we shall undoubtedly have a spirited Presidential campaign...

It matters not who the nominee of the Baltimore Convention may be, but we can well expect...
