—These useful ruteles are introduced to the public by the inventor, and especially recommended to the notice of the Ladies, for whose particular are they are intended. Something of the kind has ever been needed, to hold or fasten their needle work while engaged in sewing. Many a fair form is ruined, and made round-shouldered, by their position while at work, as well as health impaired, by sluing in such an unhealthy position. Improvements are constantly being introduced to lessen the isbor of men, but little or nothing has been done to alleviate the burden of the other sex. This article, however, will greatly relieve, while it will facilitate their work. The Sewing Birds have been used by many ladies in New England, and has met with universal approposition.

The Theory and the Practice.

The cures from his medicine have been, and will be just in proportion to the number of cases in which it is ased. Its only mircculous powers, are those which it possesses from and in common with nature, whose operations it can only assist and haston. Its action is mediate, and, house calm, energetic. It allows traits mediate, and, though calm, energetic. It allays irritation, while it promotes secretion and excretion. It can
never fail to palliate, and where a cure is possible, it
will cure. This was the theory of the medicine, as invented; and experience, in numerous cases, of every
kind and variety, has demonstrated the correctness of
its principles.
