RAUD IN THE WHIG CONVESTION. Any person who will read the preliminary lovements of the Whig Convention, dance sist the conclusion that from the start, the Scott men intended to perpetrate a fraud. The editor of the Washington Republic, who was present says that midday was fixed upon by the Congres sional Committee as the period for opening proeedings; but the hour was somewhat anticipat ed. At 20 minutes to 12, Washington time-10 o 12 by Baltimore watch-Hon. Geo. Evans, of laine, was called to the nost of temporary

entered the hall while the motion was being recited, rose to protest against the action as irregular. The delegations from Louisians and other | that paper from Baltimore. onthern States, he said, regarded the time amed by the Committee at Washington as the imp to be observed bona fide by the Convention, and he felt it due to himself and to his fellow epresentatives from the South, to warn membe that if this seeming desire to take advantage of accidents were suffered to continue, it would prove a fruitful source of discord. Mr. Sevier's observations elicited considerable applause from some of the delegates; but that was all. The Chairman submitted the motion for the commit-

tee, and pronounced it carried. This movement the Scott men no doubt considered a cunning trick; it may be so, for it is ertainly more complimentary to their political knavery than their fraternal honesty. In the Baltimore Sun and Philadelphia Ledger, we find the following report of Mr. Sevier's appeal to the Scott men not to commit this bare-

faced fraud at the commencement of the deliber-

Before the question was taken, Mr. Sevier, of Louisiana, said—I desire to enter my protest against all the action which has taken place in this Hall. The hour for the meeting of this convention was designated by the Whig Representatives in Congress, whose duty it was made to fix the hour and place. But that hour has not yet arrived. (Applause.) I came here as a Representative from Louisiana, before the hour of twelve, as fixed by the time of the Observation of twelve, as fixed by the time of the Observation of the City of Washington, and I find this Farawell Address. of keeping ourselves free from ations of the Convention.

tions from the Southern States are not represen-ted; therefore, I beg of the Whigs of the differtime was made on the Cleveland and Pittsburgh | cut States to desist from any further action at present, if they desire unity and harmony, and the success of the Whig party in the National Convention. The hour of 12, I repeat, has not et arrived. The best remedy for eyes weakened by night use, is a fine stream of cold water frequently applied to them —London Lancet.

Ventilation of Cars. for Washington, for the purpose of impeach-Ed. Am. R. R. Journal-Sin : A correspond dent in your last Journal puts some queries as to the cause or source of dust on our railroads. The writer of this has devoted years of though and observation to the subject, and has come to the conclusion that the dust from the road bec s not disturbed by the mere rotating action the wheels and axles, but by the volume of air which the bottom of the car and the trucks force long between the rails. A strong current of air is always forcing itself up between the plat forms of the cars, in the direction that the train traveling, and every one who has made the sub-ject one of observation has noticed that the reat latform of every car in the train was covered with dust and gravel.

There is no vacuum formed between the cars the motion of the train. When the train is at rest—the space between the cars is of course filled with air—when under way, as a general thing, the pressure of the latteral currents which

have been opened by the engines, are equal, and merely compress the air in the space between the cars, and cause it to break up into whirling eddies. The prime cause of dust inside of the car, is to be found in the system of ventilation generally adopted, the ventilators being con-structed so as to exhaust the air out through the top, and feed it in through the window. A more perfect method to fill a car with dust, and subject passengers to strong draughts of air could no se dovised. Our eastern roads are now revers ing this order of things, and making the window the exhauster and the top the feeder, under Pain's patents, an advertisement of which we notice in your Journal. This simple alteration has entire-ly remedied all inconvenience from dust or cinder, and enables the traveler to enjoy in the hottest weather a pure cool atmosph

ITP DR. GUYSOTT'S Improved Extract of Vellew Dock and Sarsoparilla is a sure remedy for Hereditary Traint.

Thousands of persons are cursed with grievous compleints, which they inherit from their parents. The use of the Vellew Dock and Sarseparilla will prevent all this, and save a vast amount of misery, and many valuable lives, for it thoroughly expels from the system the latest tains, which is the seed of disease, and so takes a fluctured by which the sins or misfortunes of the parents are so often visited upon the innocent offspring.

Parents owes it otheir children to guard them against the effects of maladies that may be communicated by descett, and children of parents that may have at any time been affected with Consamption, Scrofula, or Sphilis, owe it to themselves to take precaution against the disease heing revived in them. Gnysott's Extract of Yellow Dock and Sarsaparilla is a sure autdote in such cases. See severtisement.
