Extensive Flouring Mill.-A company of gen tlemen, embracing in their number some of the most extensive and enterprising capitalists in Allegheny county, are about to erect one of the largest flouring mills in the United States, in Allegheny City. Gentlemen connected with the company have visited many extensive establishments in different parts of this country, and they are prepared to go shead with all the late imcompany have selected one of the best sites in the west, borth for the reception of grain and first piece. the ready transhipment of the manufactured article to a market. Their mill is to be located on and is about 150 feet square. They propose to lay a track for cars from the Ohio and Pennsylvania railroad, over the canal, into the second story of the building. By this means, cars loaded with wheat in the great wheat-growing districts in Ohio, through which this road passes, can be taken into the mill without trouble. The

This will save, both in the reception of the articles and shipment, the usual expenses of transhipment and drayage. We anticipate for this enterprising company an extraordinary business. By the application of a boot, he was made to vacate the premises in the midst of one of his eloquent flights.

Attention is called to the advertisement of the Pittsburgh Trust and Savings Company, in another column. Books will be opened to-day, at the office of Messrs.
