Eastern consignments will be received on the platform, from the cars, freight and charges paid, and the Goods forwarded immediately, by steamboat, railroad or otherwise, as directed.

Persons wishing their Goods insured, will please give receipts and timely notice to that effect.

Sales and purchases made, and orders for Pittsburgh manufactures filled, on liberal terms.

January 1, 1853.

Pudder & Ford,
MANUFACTURERS AND DEALERS IN
MANCHESTER MINERAL PAINT,
ALLEGHENY, CITY PA.

No. 114 WOOD STREET, Pittsburgh, Pa., December 16, 1851.

I have analyzed a sample of MANCHESTER MINERAL PAINT, for PUDDER & FORD, and find it to contain the following:

Silica,	57.21
Alumina,	5.34
Per Oxide of Iron,	18.41
Lime,	24
Magnesia,	12
Oxide of Manganese,	8.00
Water and Loss,	7.00
	100.00

The Powdered Sample, contained in the box, which I supposed was the one you desired also to have analyzed, I find to differ from any average of the lumps powdered, and mixed together. This last yields as follows:

Per Oxide of Iron,	58.58
Silica and Alumina,	33.00
Magnesia,	88
Water and Loss,	7.96
	100.40

This difference I presume arises from the mineral not being uniform, some portions containing more iron than others. The analysis shows the article to be well suited for a paint. I find that by calcining the powder by a pretty high heat, the color is much improved, or at least converted into a fine red.

AMES R. CHILTON, M. D., Chemist.

☞ For Sale by JOEL MOHLER, 241 Liberty street. mar16-1y

JOSEPH LIPPINCOTT. WM. G. BARR.

LIPPINCOTT & BARR,
(LATE J. & S. STRICKLAND & CO.,)
MANUFACTURERS OF IRON FIRE PROOF SAFES, Second Street, between Wood and Smithfield—Keep constantly on hand a large assortment of the above, which they offer at the lowest cash prices. Purchasers are invited to call and examine for themselves.

Tuesday afternoon, July 25, 1848, the undersigned were called upon by Messrs. Lippincott & Barr, to witness an honest trial of their Fire Proof Safes. The furnace being prepared, the Safe was placed inside a barrel with books, papers and some money; when the door of the Safe was closed and the fire kindled at a quarter past 2 o'clock, and in a short time the Safe was red hot, and continued till half past 6 o'clock, being about four and a half hours, when the combustible matter in the barrel was entirely consumed. The furnace was then pulled down, Safe cooled, and door opened—the books, papers and money safe. The heat was so great as to melt off the brass mountings. We therefore take pleasure in recommending these Safes to the public, as being, in our judgment, entirely fire proof.

Pudder & Ford,
MANUFACTURERS AND DEALERS IN
MANCHESTER MINERAL PAINT,
ALLEGHENY, CITY PA.

No. 114 WOOD STREET, Pittsburgh, Pa., December 16, 1851.

I have analyzed a sample of MANCHESTER MINERAL PAINT, for PUDDER & FORD, and find it to contain the following:

Silica,	57.21
Alumina,	5.34
Per Oxide of Iron,	18.41
Lime,	24
Magnesia,	12
Oxide of Manganese,	8.00
Water and Loss,	7.00
	100.00

The Powdered Sample, contained in the box, which I supposed was the one you desired also to have analyzed, I find to differ from any average of the lumps powdered, and mixed together. This last yields as follows:

Per Oxide of Iron,	58.58
Silica and Alumina,	33.00
Magnesia,	88
Water and Loss,	7.96
	100.40

This difference I presume arises from the mineral not being uniform, some portions containing more Iron than others. The analysis shows the article to be well suited for a paint. I find that by calcining the powder by a pretty high heat, the color is much improved, or at least converted into a fine red.

AMES R. CHILTON, M. D., Chemist.
