Flowered, Gothle and Flain, a secreted prices: HOW TO CURR HERNIA, OR RUPTURE.

THIS DISEASE is now so common that thousands of instruments are in use for, not only its relief, but even its radical cure, most of which are entirely worthless, and until for the purpose designed. The instrument used in the cure of hernia or rupture is called a raws, and should be well made, and well adapted to the broken parts, in order to give relief, or offect a cure. That a cure of rupture can be effected; I woulf adries any one to call on the undersigned, and he will give them oridence beyond all question of doubt. I have in several instances, during the past year, cured cases of rupture, some of both sides, and in the ease of children, almost inevitably, by the application of DR. HUBBARDES TRUES, as instrument that can be perfectly fitted to the parts, having a wooden, and capable of affording any amount of pressure that may be desired. It will not move from the parts to which it is adapted, and it affords a pressure, without pain, that no other Trues possesses.

The I would respectfully invite the attention of physicians, and those suffering from the disease, to this instruments.
