MORNING POST JOH OFFICE

We have done a very large amount of printing in our Job Office within the last ten days, but can do still more yet. We will suit all custome as to the speed and accuracy of our work. INTERROGATORIES .- We received, too late for

ublication, yesterday, the interrogatories ad dressed to the candidates for the legislature. We cannot publish the names of the signers, some two hundred in number. It would occupy too much space, which we desire to devote to other purposes.

Governor Biggen arrived in our city last attention his position and public services deserve.

M'CLINTOCK VS. CAROTHERS. The editor of the Gazette thinks it is a very small affair to try to make capital for Dr. M'Clintock out of the well known fact that he is, and has ever been the friend of the tan hour law; while Dr. our lifths of the voters of the county, to decid whether it is a small matter or not. The Gaselfe does not deny the facts that we stated in regard to the two Doctors, in relation to this subject, but, to divert public attention, he turns upon Col. Moffit, and endcavors to compel him to bear a portion of the crime, for crime we believe it would be to repeal that law. That some of theoperatives, who have been out of employment for months, because the mills were stopped perhaps for the very purpose, were induced to sign such petitions, either knowingly, or without boing aware of their contents, is quite possible. But that working men, and women and children, who toil for bread, desire to work twelve or fourteen hours per day instead of ten hours, i simply absurd. That they desire the repeal of the law, or a modification of it that would lead to an increase of their toil, is an assertion that

no saue man would dare to make. But that Dr. Carothers did try to procure such a modification of the law, as would have rendered it wholly ineffectual to protect the prove, and which the Gazette has not yet ver ... possess. tured to denv.

On Senate Journal of 1851, page 165, we find as follows:

"Mr. Carother's pres Colton Factories in Allegheny City, praying for a repeal of the "Ion Hour Law." See Mr. Carother's action on the same subject. Pages 105, 181, and 365, the latter ovidencing this determination for repeal after the defeat of the bill." On page 138, as follows:

"Mr. Carothers read in his place, and presented to the hair, bill entitled "Supplement to an act entitled An-tifor the relief of the heirs of James Caldwell, deceased ad relative to the hours of labor in Manufacturing estab-thments, approved the 21st April 1849." On page 181, same Journal : "Mr. Carothers presented three petitions from operatives a Allegheny County, praying for a repeat of the Ten Hour

It will be observed that the petitions are entitled Petitions for the repeal of the Ten Hour Law." The bill read in place by Carothers was n pursuance of these petitions; and was the same bill for which, as we stated in our paper of Monday, Dr. Carothers made a speech, and for which he voted in all its stages of progress. And the record shows that when an amendment coratic candidate for Canal Commissioner, Mr. Forsyth, made one of his sensible, truly democratlospesches against Dr. Carothers' bill, and it was

DR. M. W. HUBBARD'S TRUES foot e radical cure of Hernia or Rupture possesses a combination of advan-tages not possessed by any other Truss. It can be adapted ARY to the shape of any person, so as to fit perfectly. The post in the to the pad can be changed, so as to sait the corpulent of spare. The pressure may be varied, at pleasure, to any The pad is applied directly over, and in the direction of the Inguinal Canal, whether the rupture has gone down and became large, or not. The ped having a size and shape in bear too hard upon the firm ligaments and muscles ear slie of Canal, or upon the Bone below. The Pad drops in little depth, directly over the Inguinal Region, with a light pressure, because itstrikes none of the hard, resisting parts surrounding. This gives it a perfect steadiness, so that if it

properly applied, it will not stir from its place a hair'sproperly, applied, it will not sur-from its place a hair-breadth.

The Truss possesses mall-sability, and sufficient weight and atrength to maintain the postion in which it is left, with just sufficient elasticity for its application. When it is applied with an actual pressure of one pound, it will exercise a retentive power of at least three pounds. The pressure increases so rapidly as the Pad receiles, a light pressure, a little more than sufficient to keep the rupture up in a state of rest, is sufficient to secure the person sgains the most violent exertion. There is no other Truss that will retain a rupture with as little pressure, or can be worn with as much case. The person may get into any shape or position he pleases, and the pad will not cramp or move in the least from its place.

There are no two persons precisely the same shape and requiring the same pressurer, hence the importance of having a truss association to into most minute variations, so as to be fitted perfectly to the smost minute variations, so as to be fitted perfectly to the she changed at pleasure.

SF They can be sent to any part of the United States by taking the measure around the body, and stating the side affected. Price \$5. Address Dr. George II. Keyser, No. 140, corner of Wood street and Virgin alley, Pittsburg, Pa. Dr. K. gives partleular attention to the fitting of trusses. Children invariably cured.
