ARICHICAN HAIR. HESTORATIVES

Is truly the wonder of the age. Perhaps no article ever offered to the public's received with greater favor than this, and persons flaid or becoming so have only to test the article to be fully satisfied. The Cleveland Mended of Tweeday evening, March 16, 1833, has the following with regard to it.

ARRICAN HAIR REYMMATIVE.—We rarely notice editorially any of the patent or copyright claimants for public favor, but with pleasure depart from our unnai rule to speak of the article named above. We really believe it does all that its discoverer claims for it-rectores hair to heads hopelessly bald. Several gentlemengf our acquaintance, in this city, are using it, and will willingly even acquaintance, in this city. are using it, and will willingly even acquaintance, in this TREASURER'S REPORT OF ST. PAUL'S CATHE-WOMAN'S RIGHT CONVENTIONS.

The Women's Convention amid a stormy session, adopted fesolutions claiming the elective franchise, political stations, &c. Resolutions were offered by a male delegate, that the women confine their speeches to ten minutes, which were indignantly voted down. Mrs. Clark endeavored to speak a word in favor of man, but was gagged, amid hisses, and cries of turn her out. &c. Abby Kelly bitterly attacked the Churches and Ministers; an attempt was made to put her down, but she declared she would not be put down. Dreadful confusion ensued. A motion was made to adjourn, which was carried, and the Presidentess field, when the Hall was cleared, in terrible commotion. The market yesterday was generally quiet, and there was no material change in quotations. The weather was clear and pleasant, and a good general business was doing. It is weather was clear the property of t prat.—The following is a faithful expose of the Treasurer's Report of funds received and expendleghony county Cs. ed since the commencement of the building: A T the Commercial Eales Rooms, corner of Wood and Fifth streets, at 10 o'clock, A. The Truss possesses malleability, and sufficient weight and strength to maintain the position in which it is left, with just sufficient elisaticity for its application. When it is applied with an actual pressure of one pound, it will excrete a retentive power of at least three pounds. The pressure, a little more than sufficient to keep the rupture in a state of rest, is sufficient to scure the person against the most violent exertion. There is no other Truss that will retain a rupture with as little pressure, or can be worn with as magh ease. The person may get into any shape or position he pleases, and the pad will not cramp or more in the least from its place.

There are no two persons precisely the same shape and requiring the same pressure, hence the importance of leaving a truss susceptible of the most minute variations, so as to be fitted perfectly to the shape, having any degree of pressure desired, which can be changed at pleasure.
