HERE is evidence that must satisfy every mind that B. A. Fahnestock's Vermifuge is the only article that can be administered with the certainty of expelling worms:

HAULEA, N. S., Jan. 23, 1852.

I heteby certify, that a child of mine, aged, three years, had been very ill for a month with a pain in the chest, general weakness, and loss of appetite. I was advised, to try. B. A. Fahnestock's Vermifuge, and accordingly bought a bottle from M. Naylor, Druggist, Granyille street. Having administered a portion of it, he passed, within twenty four hours, Two Hundred and Forty-two Worms, from sit to twelve inches in length. The child, immediately after this, had its appetite restored, and soon enjoyed perfect health. Another child, seven years old, who had been more or less sick from his birth, took they remainder of the bottle, which caused him to pass One Hundred and Sirty two Worms. From that time to the present, his health has been perfectly good, and he has thrived as well as any child could.
