THE WEEKLY POST

We took up by accident to-day our weekly paper, and on looking it over, came to the conclusion that the subscribers to it could not fail to be satisfied that they got the worth of their money. If they read even the one-half of the matter published in the West and in the country, they will find it to be the most valuable and interesting paper published in the West and in the country. The paper is full of interesting reading matter, and we take the liberty to say that there is not a column in it that will not present a large amount of reading matter interesting to all persons who are in the habit of reading the paper.
