She is the centre of a splendid system of railroads, and is rapidly increasing in population and wealth. The business, the interpopulation and wealth. The business, the interests, and the occupations of our people are accommulating. Regulations will then be resumed, in which the propositions of Prince Measchikoff will form the base of a new convention with the Ports, in which the Four Powers ser to participate. It is asserted that Austria and Prussia were willing to abolished, and the State receives to agree to these terms, and that Baron Bourquency on the part of France thought them worthy of consideration, but that Lord Westmoreland insisted on the revision of the existing treaties. The Foreign news by the Arabia's mails indicates that the Emperor of Russia is more peaceably disposed; and that his former demands would be greatly modified, if the Western Powwould be greatly modified, if the Western Powers were still inclined to a peaceful settlement. But Eugland and France seem now resolved on striking a heavy and effectual blow, that shall humble the pride of Russia, and diminish its power to disturb the peace of Europe for some time to come. Those nations seem now resolved on battle; and to use the present opportunity not only to weaken Russia, but to acquire a footing and influence in Turkey that will make that Empire an humble dependant on England and France. A long article in the London Times advocates war, and no treaty of peace based upon propositions that here been heretofore made.
