We take the following from the Washington Union, and it indicates that at Washington the apprehension is becoming general, that in the midst of the tremendous conflict about commencing in Europe, this country can hardly hope to escape being drawn into the struggle. The announcement of the British Government, through Lord Clarendon, proclaims again the right of search, and the intention to exercise it. The war of 1812 arose out of the same arrogant and insulting claim. The treaty of peace, concluded at its close, left the question unsettled. And greatly exercised just now, upon a comet, with now, after nearly forty years of disuse, the right is a long tail to it, that has made its appearance in the Union.

At soven this evening the Senate held a session for the consideration of bills on the private calendar. Much business was disposed of and vessels was for British seamen; now it will be would imagine they expect to make quite a specnot, and if any such are found, they are seized apprehension then felt, that, on its way back, it his death. "The recent announcement of Lord Clarendon to Riga marchants, to the effect that all Russian produce, to whome severe belonging, and even in neutral vessels, would be regarded as lawful prize in the event of war, was referred to with telling effect by Mr. Peckham, in the debate in the house on Friday on the six-steamer bill. The assumption of such a right as belonging to the belligerent is characteristic of that arrogance which has always predominated in British councils. Such announcement cannot fall to impress upon overy American the fact that the attempt of Great Britain to enforce the doctrine avoved by Lord Clarendon must involve the United States in the impending atruggle. For us to submit (as remarked by a cotemporary) to so arrogant a pretemion as is here put forth, and its incorporation into the law of nations as one of the right belingerents, would be seen on its way back this spring. It has been to pay the sun a visit, and en a senso of such arrogance of millions of endless spa thousands of millions of miles away from great source of light and hoat of our solar strongle. MODESTY IN NEW YORK. The caption of this article may surprise some. for it is generally understood that there is no such thing as modesty in Gotham. But a peti tion has lately been presented in Congress, from nence" of that city. The titles which the New ment. Yorkers complacently apply to their city are rather numerous, and very fiattering. "Com- left New York on Eunday last, in the steamer Continent," "the London of the Western hemis" phere," "the centre of light and intelligence," &c., are some of the terms employed to express their estimate of the importance of the "great ment of French & Richards, of Philadelphia. metropolis." WEEKLY MONEY ARTICLE.

Money is not as abundant at present, as it wa a few weeks ago, in this market. From 1 to 1 per cent. is frequently paid for loans on short time. The demands for money are numerous, and the amount required for railroad purposes so large, that money must continue to loan on high prices.

Those who are opposed to the repeal of the usury laws, would find it difficult to name any soury laws, would may it dimension to name any good they do. Money is treated as merchandise in all commercial cities, and its price, like the price of other commodities, is regulated by the demand. Those laws are a dead letter, except that they alarm the timid and cautious, and prevent investments of money in loans at a fair price, thus leaving the market to those who will run the risk, and enabling them to command exorbitant rates. We hope our legislature will not adjourn without putting an end to this evil.

In New York considerable alarm seems to exist among capitalists and business men, arising

This is to certify that my child, three years old, was troubled with worms some six months. I had tried several kinds of medicine, but none of them done any good; and it was not until I tried Dr. MI Lane's celebrated. Vermilling that she found sny relief. I gave her the contents of one bottle, which brought from her a very large quantity of worms, but they were so completely out to plees it was impossible to count them. My daughter is now doing well; indeed she is completely restored to health. It therefore take pleasure in recommending it to parents. I would say, by all means keep a supply of this valuable medicine constantly in your houses. I have known many children to die süddenly from the effects of worms. It also not unfroquently happens that children are treated for croup, when the choking and coughing is most altogether by the irritation of worms. Therefore, we say again, keep it always in the house; it costs but little, and may be the means of saving life; and at any rate it will save physician's bill.
