PITTSBURGH: VEDNESDAY MORNINGOCTOBER 1

MORNING POST JOB OFFICE. We would call the attention of MERCHANTS ANI BUSINESS MEN to the fact that we have just receive from Philadelphia a number of forts of new Job Type, an are, new prepared to fill orders for Cards, Circulars, Bil Heads, Paper Books, Postpris, and Programmes for exhibitions. All orders will be promptly filled.

A GRAND SCHEME FOR THE COLOR-In August last, a National Convention of colored people was held at Cleveland, Ohio. It was posed of delegates from most of the States. It was called the " National Emigration Convention," and its objects were to consider the political destinies of the black race; and recommend a plan of emigration to countries where they can enjoy political liberty, and form nations

The report of the Committee takes strong ground in favor of remaining upon this continent, but not in the United States. In the United States it is admitted that the white race | ped on board the Atlantic, which sailed on Sathas secured the ascendancy, and will ever re- urday. Just as the steamer was about to sail he considered the country most favorable to the de | wished no such men to go to sea with him. velopement, physically or mentally, of the col-

regenerated, and formed into free, intelligent and prosperous nations. The West India Islands, Central America and all the northern and middle portions of South America, including the whole of Brazil, are designated as the regions desired : and that can be obtained as the seat of negro civilization and empire. These regions and islands together are represented as contain ing twenty four and a half millions of population; but one seventh of which, some three and a balf millions, are whites of pure European extraction; and the remainder, nearly twenty-one million, are colored pecmense preponderance of the colored races in those regions, it is supposed, will enable them, with the aid of emigration from the United States, to take possession of all those countries and islands, and become the ruling face in the empires to be formed out of those wide and fruitful realms. The committee expresses full confidence in the practicability of this great undertaking; and that nothing is wanting to its success at no distant day but unanimity of sentiment and action among the masses of the colored people. The climate of those regions is race, while to the European races, it is enervating and destructive; and this fact, added to the present immense superiority of numbers on the part of the negroes, is relied on as a sure guarantee their race could forever maintain the possession and control of those regions.

in the train of this mighty movement. With the West India Islands and Central and South America composing free negro nations, slavery in the United States would, they suppose, soon be at an end. The facility of escape, the near neighborhood of friends and aid, it is urged, would rapidly drain of from the Southern States

the people and nations of the earth; and it is arged by many arguments. On one point the Committee expresses the

most positive and immorable determination. We give it in their own language : "Upon the American Continent we are deter-

"termined to ramain, despite every opposition that can be urged against us." In Canada they say they cannot remain, because the British provinces will soon belong to the United States. To all further acquisitions by the United States southward, the Committee is utterly opposed. The whole tone of the Report indicates that these projected empires to the south of us would be anything but friends

of our republic.

Dr. M. R. Dolaney, of Pittsburgh, was the chairman of the Committee that made this report to the convention. It was, of course,

If Doctor D. drafted this report it certainly does him much credit for learning and ability; and cannot fail to establish for him a reputation for vigor and brilliancy of imagination never yet surpassed. It is a vast conception of impossible birth. The Committee seem to have entirely overlooked the strength of the "powers on earth" that would oppose the Africaniza-England, France, Spain, Holland and Denmark own large portions of the domains that are thus to be seized and converted into Africanized empires; and where are the armies and na vies, the arms and munitions of war, with which these rich possessions are to be wrested from the European powers? And the South American republics and the empire of Brazil, have they no strength to preserve their existence against service insurrection, and negro invasion? The United States, too, with its route of commerce across Central America, its friendly relations with the doomed republics of the South, its intention to annex Cubs, and a little more, will she not bear a part in this grand tragi-comic emeute? We can assure our colored neighbors that Uncle Sam. Johnny Bull, John ny Crapheau. Queen Christina and the Datch, to the success of this splendid project. No thing but a sudden coup de moun could give it any chance of success. And for that there is no adequate preparation. A few years delay,

and American railroads and canals will span all the realms of Central America. We have no motive in noticing this gorgeous dream of "the committee," except to show its

fallacy, its impracticability, in fact, its absordity. No sensible man, whatever his color, should be for a moment deceived by such impracticable

On the African coast already exists a thriving and prosperous republic. It is the native home of the African race; and there he can enjoy the all the advantages of civilization and freedom. Every colored man in this country will be welcomed there as a free citizen; and there he can calamity. not only-prosper, and secure his own comfort and hanniness, but become a teacher and bene factor of his kindred races; and become an agent in carrying civilization and christianity to a benighted continent. That any one will be turned aside from so noble a mission by the delusive dream of conquest and empire in the Western Hemisphere is an absurdity too monstrous and mischievous to be believed. Yet "the Committees" Report was accepted, and adopted and endorsed by a "National Convention;" and is published and sent forth to the world.

The Chronicle [says] Gen. Larimer will honor drafts to any amount for the Howard Association, and that he is a candidate for the get no better paper then. It is all right now.

with the Appendatox.

The Secretary of Interior and Postmaster General are visiting Philadelphia and New York for the purpose of selecting a proper site for Post Offices, United States Court Rooms, &c. The Cincinnati Gazette wants George E. Pugh -who was elected last winter to succeed Chase in the United States Senate-to resign his post. A cool proposition, that. Wouldn't it be delightful to have a Fusionist in place of a straight-

The New York papers tell a story which, if true, is a good joke on the Know-Nothings. It 228 158 158 is stated that Daniel Ullman, reported the Know-Nothing candidate for Governor, is not a native of the United States, but an Asiatic Israelite! A Buffalo paper offers to wager \$100 on the correctness of this assertion. One of the escaped soamen of the Arctic ship-

forward Democrat?

tain it; and will never admit the negro race to was discovered by Captain West, who took him 25 483 88 23 political and social equality. But this is not by the collar and marched him ashore, saying he The loss of the Arctic was the theme, on Sunday, of nearly every sermon preached in New | 588 | 25 | 22 The Committee then proceeds to mark out a York City. Such overwhelming sorrow has visgrand scheme by which the negro race may be ited many families, that probably not a single congregation was without mourners for some lost friend, and the scenes in the various churches were solemn and impressive. At Yonkers.

where Captain Luce resides, there was a special thanksgiving in the Episcopal church over his niraculous escape. Speed versus Safety-The Conduct of the Arctic's Crew.

The recent disaster to the Arctic has caused

all newspaperdom to discuss the relative safety of sailing and steam vessels, and the suggesting of numberless precautions to avoid future calamities of the kind. A New York cotempople of African and Indian origin. This im- | rary, whose opinions are generally carefully weighed, gives as its advice that the steamers should take the Southern passage whenever "the Northern is likely to be foggy. The vogage," it sys, "will require more time, but is a little delay to be considered as an evil equivalent to a risk of life .- Let the passengers be landed two days later, so that they be landed in safety." This going backwards in the length of time employed on a voyage will never do in the year of grace, 1854. It may operate well enough until the terror of some recent calamity is worn off; but then, we venture say, nineteen out of twenty persons would take the ship that made the Prench vessel, the Vesta, which was it that made it in twelve, even though the risk was somewhat greater. Head the Archive was summer and the commander, at the rate of eight known and the commander, at the rate of eight known and the commander. represented as entirely congenial to the colored twenty persons would take the ship that made somewhat greater. Had the Arctic been fitted stated on the same authority at not less than out with the requisite number of hoats, and had twelve knots. Immediately after the collision

on the success of the great enterprise; and that the behaved themselves as become their race could forever maintain the possession and control of those regions.

Other great create, it is supposed, will follow in the train of this mighty movement. With the West India Islands and Central and South America composing free negro nations, slavery and self-marrifoling part, but did precisely what and self-marrifoling part, but did precisely what and self-marrifoling part, but did precisely what a suppose of the self-way rush of water. DEATH UNDER THE EXTRACTION OF A TOOTH

Commercial, 16th.

From the Boston Post. We have received the following letter from the have received the following letter from the stomach, which is allowed too certain astronomical discoveries and was been by an excess of intellectual labor or an overchan Phomix, Esq., of San Diego, Cal., while a gard to certain astronomical discoveries and possibly an excess of inellectual labor or an own to be proposed of, in. the article affixed, the moot that it is a large tin plan with dinty in the bottom, is overthrown by the great Pholix. But selence must sland aven though savina fall, as the Professor said when he wes kicked over by a Layden jar, and we refer the matter to the philosophers:

San Dirguo, August 27, 1854.

I enclose you a little astronomical information communicated by me to the San Diego Heruld of the 26th inst, which I think may be of interest to Agassiz, Sparks, and other old playmates of mine at Harvard. Modesty has led me to speak of Boos's telescope, but the fact is between you

omposition was made entirely by me, with one f Ringard's small opera glosses, magnifying but 4½ times. A singular discovery with regard to the sun will be made public in the next Herld. Romember me respectfully to Mrs. Par-ington and Old Roger, and believe me to re-Very truly yours,
John Phonix." "The Hoon—This respieudent luminary, like nany a youth on the 4th of July, is now in possession of) its first quarter. The evenings of the past week have been beautifully illumina-

apses between one new moon and another. I was supposed by the ancient philosophers that the moon was made of green cheese. Kepler and Tyco Brahe, however, held to the opinion and Tyco Brahe, however, held to the opinion that it was composed of Charlotte Russe, the dark portions of its surface, being sponge cake, the light, blanc mange. The modern improvements in science and the use of Lord Ross's famous telescope have demonstrated the atsurdity of all these speculations, in proving conclusively that the moon is mainly composed of the Ferro-ses-qui-cyanuret of the cyanide of potassium. No one, up to the latest dates from the Atlantic states, has succeeded in reaching the moon. Should any one do so hereafter, it will probably be a woman, as the sex will never robably he a woman, as the sex will nover case making an exertion for that purpose while

Upon the whole, we may consider the moon an excellent institution among the many that we enjoy under a free republican form of governpou, that Mr. Pierce cannot veto it, no matter that inclination from nation eel to do it.'

A Valuable Discovery. Captain Marcy's expedition to the head waters of the Big Wichita, traversed and explored a region of country hitherto unknown. Dr. Shumard, the surgeon and geologist of the ex-redition, publishes in the Fort Smith, Ark., Herald, an interesting description of the enterprise, rom which we learn that the Wichita river take its origin in a system of high bluffs, on the the borders of the Slaus Estalado, which at the cad of the river form a regular semi-circle or orse shoe, and from which are sent out a numher of small atteams, converging at the distance of two or three miles from the main river, which from its shares to its mouth runs through high bluff banks composed mostly of clay and red gypsum. It is to the extensive beds of this later through which the Wichita Brazos, and Red

Rivers flow, that their waters, owe their bitter taste. This gypaum, by analysis yields glauber and epsom salts. The great gypaum field is of the enormous thickness of seven hundred feet of the purest quality, and extends for many hun-dred miles. This is one of the most valus ble discoveries of recent date, and must at no distant day lead to the settlement of that [from the Philadelphia Ledger.] Singular and Patal Event.

James Pollock, aged about 50, who occasionally aedisted the hostler at F. McKeown's hotel, in Shippen single. Letween Third and Fourth, mat with as a well death, on Saturday afternoon, from the bite of a vicious horse. He had been and was in the act of reaching his head, when the animal made a sudden attack upon him. He getting medical aid, but at last a doctor passing getting medical and, but at last a doctor passing in his gig was stopped, and the case represented to him. He very promptly inserted a tube to convey air to the lungs of the dying man, but the delay that occurred proved fatal, and the unfortunate man expired. He leaves a wife and a large family of children, most of whom are grown direction, the statements herotofore published concur, and that the captain of the Vesta was thus put out of bearing of the signal guns which she subsequently fired, is not unaccount-

" Sengible to the Last," Brown had been long on a sick bed, was fre-nearly delirious, and now obviously approach-d his end. His old friend Smith, had come a long ride in the cold December air to visit the dying man, and bid him a solemn good-bye be-fore his departure to "that undiscovered coun-try from whose bourne no traveler returns." Smith enters the house carefully, inquires after The price of coal has fallen in Boston \$1 to Official notice has been given that the rate of postage from the United States to Australia has been reduced from 45 to 38 cents. the health of Mr. Brown and hopes he may be n worse than when he saw him last. hold out much longer.

Smith—(Who sits near the door, blowing, his cold fingers)—Is it possible? I'm sorry to dear it. Would you have any objection to my speaking a word with him?

Mrs. Brown—Oh, no—but he's out of his head now—he wouldn't know you. (Here Smith ap-proaches the bed—sick man looks at him and exclaims—"Mrs. Brown give that man a glass exclaims—" hars. Brown give take man's guess of hot toddy—he's cold!"

Smith—(delightfully)—You say, Mrs. Brown, he is out of his head, but that remark of his There were coined at the Branch Mint, New strikes me as a very sensible observation
