Not three hours, but one quarter of an hour served to lay all these gallant fellows low, and every soul would here been out off had it not been for the heavy dragoons, who charged as rapidly as they could in the track of the devoted "light." Of this latter charge Lord Ragian says: "The charge of this brigade (heavy cavalry) was one of the most successful I ever the winessed: was never for a moment doubtful. witnessed; was never for a moment doubtful, and was in the highest degree creditable to Brigadier General Scarlett and the officers and men engaged in it." It, with the brave stand made by the Scotch Highlanders, and some asnoe given by the French certainly redeemed the day.

A letter writer adds the following in relation to this most galiant but fatal charge of the light

This, it is also said, was obeyed, under protest, by the gallant Earl. The whole brigade then charged onwards against the battery of nine guns which breasted the valley.

These guns opened a fearful discharge of grape upon the gallant fellows, whilst the batteries upon the right and left poured in vollies of round shot and shell. Undaunted by this murderous fire, the British cavalry pushed on, with-

the sabre, and the nine camon were in the possession of our cavalry. A strong line of Russian ores had now concentrated to the rear of this battery, and at this fresh foe did our brave men charge. The enemy's cavalry gave way before the vigor of the shock, and turned tail, pursued by the British.
