Genilemen: I have looked over "Henck's Fleid Book for Bailroad Engineers," and think it well adapted to the object its author proposes, and have no question but it wills to found a very useful and practical volume both for officeand field work.

Thoy, April 21, 1854.

I am much pleased with Mr. Henck's little manual; his "Field Book of Railroad Engineers," With the presentation of some of the most practical and useful of recognized processes among railway engineers, he has given others which, new at least in their present form, appear to being in general susceptible of available, not to say desirable, practical use. In conclusion, while I think the design of Mr. Henck's book is such as to adapt it excellently well to professional needs, I have pleasure in expressing my cordial satisfaction with its execution, alike with the present typographical taste dusplayed by his publishers.
