Piles are known by the heat, itching, and pain of the anus. Bleeding piles are caused, sometimes, by the failing of the whole bowels, which then press the intestinal casal ight against the back boues, and keeps the blood from retuining up the vessels, similar to the blood being kept at the top of your flager when a string is theil tight around it; such is frequent, and for scrofulous humors and ulcers to form therein, then procure a perfect abdominal supportor, and wear a compress to the rectum, and continue to use the salva as above; also, rad it well over the loins and abdomen for some time, and the natural belts that support the bowels will be contracted and made strong, and your life will be saved. If properly applied, every case will be cured. It never fails.
