NATER CURE INSTITUTE, HAND STREET (SOUTH SIDE.) BET. PENN STREET and Mills will be discussed and precitioned boats, generally a little over 100 crosse would require an annual addition of one road to those already existing. On the score of economy, it is well known that freights on the five past tenysars a successful liydropathist, has opened a WATER CURE institute, and contact the capacity of all the Railroads that traverse well and the capacity of all the Railroads that traverse the Middle and Eastern States from East to to the low eater of the othio one in the capacity of all the Railroads that traverse west to the supply and demand.

WATER CURE INSTITUTE, HAND STREET (SOUTH SIDE.) BET. PENN STREET of the substitute into the supply and demand.

WATER CURE INSTITUTE, Then STREET of the capacity of all the Railroads that traverse well and the capacity of all the Railroads that traverse well and the capacity of all the Railroads that traverse well and the capacity of all the Railroads that traverse well and the capacity of all the Railroads that traverse well and the capacity of all the Rai stated the amount of business done on this river; but neither they nor any other man can estimate the amount of loss occasioned by the frequent and long interruptions of its navigation requent and long interruptions of its navigation nience of wholesale purchasers, and often to the serious detriment of the shippers. Never, perhaps, was there a great trade carried on more irregularly and fitfully. All parties suffer. Sometimes there is so much coal at the wharfs carried on with steadiness and regularity, to the From Pittsburgh to the mouth of the Ohio, Is stated by the best authorities to be 977 miles, of the larger cities on the lower Ohio that pur-chasers cannot be found for it; at others times with an aggregate full of 425 feet, divided as

the supply is almost exhausted. In the course of a single season the price of coal in Cincinnati has varied from 10 to 40 cents per bushel. These boats are never brought back. Latterly, however, barges are coming into use. They are about 100 feet long, 16 feet wide, and 5 feet deep. One end has a long and easy rake; the other is square. When ready to go out, two of them are coupled together by would require only fifty looks, or pairs of looks, boat, having a rake at both ends. They are of an aggregate lift of 8½ feet, which would crethus attached to steam tow boats and taken down the river; and when the cargoes are discharged they are towed back. This, in the present condition of the river, requires a large

expenditure of power, owing to the numerous rapids they have to contend with. These, too, quire high water; but none quite so high as The average fall of the river from Pittsburgh o Cairo is a small fraction over 44 100 of a foot Were the river converted into a slackwater o the mile. There are few canals in the world, navigation, these barges would be the very of any considerable length, with so small an thing; and then low water would be better than of any considerable length, with so small an amount of lockage in proportion to their length.

high water; because a tow bost could govern from Pittsburgh to Johnstown, on the Penns. downwards, or tow back more than five times as Canal, 105 miles, the lockage is upwards of 430 many as it now can. And what is still more feet, being ten times greater, in proportion to important, the trade could be prosecuted with the distance, than will be required on the Ohio safety and regularity; and much less capital river. These facts cannot be too distinctly or emwould be needed in proportion to the amount of business done. Were it possible to estimate the advantages that would accrus to the simmense At the lowest stage of water there ought not population directly interested in this article of to be less than five feet in the navigable channel at the upper ends of the pools; nor ought the lift from one pool to the other be more than eight to nine feet. This would require the dams to be from elegent to the less than the lift from one pool to the other be more than eight to nine feet. This would require the dams to be from elegent to the less than five less than five feet in the navigable channel prime necessity, both producers and consumers, in rendering its transit regular, stoady, safe and the less than five feet in the navigable channel prime necessity, both producers and consumers, in rendering its transit regular, stoady, safe and the less than five feet in the navigable channel prime necessity, both producers and consumers, in rendering its transit regular, stoady, safe and the pools; not sa

to be from eleven to twelve feet high from their even if no other interest were to be beneficially affected. pools to rise about two or three feet upon the dams immediately above; thus obvinting, to a Upon the setting in of cold weather, large great degree, the necessity for excavations below quantities of ice form and float down the Alie

The state of the control of the cont

Great inconvenience is experienced at Pitta-burgh for want of greater depth of water during most of the year. The channel of the Min-ongahela along the levee has a pretty good The resistance offered by water to vessels moving through it, is in the ratio of their velocity. Thus, if it requires the power of one horse to move a boat one mile per hour of one horse to move a boat one mile per hour McKee's Rocks, two miles below the city, would swell it at least six feet on both sides the city, backing the Monongahela against dam No. I of the slackwater, and rendering the Allegheny a through still water, it will require the power of four horses to move it two miles per hour, and so on. But we will put it in a tabular form:

Dress Making and Milinery.
