case. It it were I would not state it, for specu-lation and hypothesis are good for nothing. O: fresh soil, and occasionally in any soil, it is injudicione to bring the bottom or subsoil to the top, from the fact that it may contain deleterious ngents, or is in itself poorer than the top spit. When this is the case, it should be simply dug over in the bottom of the trench, after the top epit is taken off. This will give the plants a

better chance to go deep with their roots, and thus place them farther from the effects of long drouth, and howsver indifferent it may be in

texture at first, if persevered in, will ultimately become good soil. Drainage is another ma-chanical means to improve the soil; without it, all wet or retentive soils are worked to a great disadvantage at all seasons, besides losing the exhilarating influence of epring and summer rair, to a considerable extent.—Country Gentle-
