platform on this vexed question has, in the con-mittee, and at the suggestion of the District of Columbia, found a constitutional basis, and for the time being rests secure by a large vote. But what of that? Does that plank suit Massachusetts and New England generally, and perhaps one or two of the Western States? Who will affirm that it does? If it suited, why, as is now being made, was an effort instituted yesterday to convene a canous on to morrow evening to take into consideration the threatened encroachments of the "slave power," and to enunciate the New England ultimatum on the subject?

Rely upon it, no compromise can be or will be made, and the upshot of the whole business will be, that all the dissentients to a national constitutional party will have leave to quit, whilst those in its favor, being freed from all such entangling alliances, and aided by the national nen of New England, of whom "more than seven thousand can be found who have not bowed the nee to Baal," will constitute the great constitutional, conservative American party.

TED CHRONOMETER WATCHES," new series." For the excellence of the principle of thes time keepers, the British Government recently awarded Fredshem \$15,850. In the Watches of the new series, Mr. F. has succeeded by a more correct adjustment in isochronism and an entirely new and peculiar construction of the train, by which more over is obtained without increase of size, in producing time keepers of wonderful and unrivalled accuracy. The great importance of the improved Yatches is a perfect regularity of time under every variety of climate, motion and position. So perfect are the adjustments, that the most violent exercise, on horse back, jumping, &c, produces on them no sensible effect. They are therefore peculiarly adapted for Railroad purposes. Their general performance is within a minute of twelve months. For sale by WISON, TURBETT & CHANEY, je9 of Market street, corner Fourth. je9
