These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselvas, but of the medicinal virtues only of Vegetable Remedies actracted by Chemical process in a state of purity, and combined too gether in such a manner as to insure the best results. The system of composition for medicines has been found in Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of actimonious and injurious qualities, by this such individual virtue puly that is desired for the curative effect is present. All the inert and obnoxious qualities of each only being retained. Hence it's self-evident that the effects should prove as they have proved, more purely remedial, and the Pillss more powerful antitote to disease than any other medicine known to the world.
