Re have been published again and again that must satisfy every one that it is a year of great abundance. This new move of the Tribune and its famine prices for the benefit of speculators, or else it is one of those malign idiosynomacies of Greeley that would do infinite mischief if not counteracted by a wholesome public sentiment In a great mart like New York an editor vile enough can make money by getting up such an alarm. Speculators there could afford to pay him bountifully for raising prices; but that an inland paper should feel bound to spread the alarm in this vicinity passes our patience, and

Maratime Powers. We frequently read elaborate disquisitions on the strength of certain European nations as maratime powers. It does not seem to occur to the authors of these plausible essays that the roial marine is the only true guage of a nation's capabilities, as the seamen to man a navy must be reared up in commercial naviga-tion. Bearing in mind, the following table, showing the comparative strength of the comworld in the year 1854, is pregnant with mean-

Our own country occupies a proud position in tonnage that our superiority is undeniable. The seamen who man our vessels are unequalled for skill, quickness, daring and courage. In fact, these have contributed very largely to the inrequisite materials for a navy of great magnitude whenever Congress deems it necessary.

The protection of our commercial interests will no doubt gradually force us into the holiding of

Something for Everyhody BLODGETT & SWEET'S Portable Oven, To which was awarded the Prize Medal of the Oblo Mechanics' Institute, May, 1856.

erranted to Cook with less fuel than any other Oven in s THIS INVENTION, the result of practical experience now confidently presented to the public, as superior point of economy, safety, darkillity, ease of management convenience, and, above all, in the unrivalled manner which it does its work, to any other invention of the known to use now in use.

It is a perfect Open, thing swarpthing required of it in the most superior manyer. It will roast, at the same time, as many different kinds of means as the Open can contain, and each piece will be perfectly sweet, and free from gases arising from the different varieties, as these gases are let of ing from the escape pipe at the top.

For baking bread and pastry, this Oven is without a rival, as, the heat is regulated by dampers at the bottom, and is under perfect control of the operator. It is not excelled in point of economy, as the heat required is generated within the Oven. The material of which it is manufactured being a non-conductor, and constructed with air chambers, there is no radiation of heat, and a small quantity of fuel will keep it going for hours. The material will neither rust, nor burn out, and the Oven will last for years.

Suitable for the smallest private family, or for Steamers and Hotels of the imagest class, manufactured by G. S. BLODGETT & CO., College street, Burlington, Vt.
