MORNING POST JOB OFFICE. BUSINESS MEN to the fact that we have just received ere now prepared to fill orders for Cards, Circulars, Bill tions. All orders will be promptly filled

We are prepared to print paper books, for use in the Supreme Court, in good style, and on short notice, and invite the legal profession to give us a call.

THE CONCERT TO-NIGHT. oure their seats early, for we predict a jam. Since the visit of the Swedish Nightingale t our city, there has not been so excellent an occasion to hear a distinguished cantatrice, as the one which offered this evening to our musicloving citizens. From what we have read and heard of Mile. Parodi, we understand that she N. Y., June 6th and 7th. This system of mediis ranked amongst the highest classes of artistic class is gaining disciples in every quarter-alour community will not remain behind other cities in appreciation of so extraordinary an entertainment.

True music is one of the most powerful agents in refining public taste. It reveals to man a world of heavenly bliss and aspirations in the depths of his own soul. The divine art snatches its melodies from heaven itself to bring the angelic tongues to linger in our ears, and to call our souls into dreams of a world where " Peace and love forever dwell." The esthetic element which music possesse

to the highest degree, is the true humanising agent which brings men to one common feeling of admiration for the Beautiful. The more we yield to the sweet influences which music exergreat heart of humanity, and the more we feel disposed to love our fellow-beings as brothers and sisters in Gop. The clamor of pational, political, social and religious contentions is hushed as soon as the voice of the artist reveals to us the mysteries of celestial, harmonious beauty, and we are electrified by a thrilling emotion of universal love. The artist thus, like the poet, becomes a priest or a priestess in the temple of the Beautiful. They both reveal the love of heaven in proclaiming, now, in thundering ac cents of eloquence, and these in gentle, whisper ing melodies of love. "Peace on earth and good will toward man !"

We have not seen any detailed programme of the concert which is to come off this evening. but from what we have heard, we shall be favored with some of the most exquisite composiand others. We promise ourselves a rich treat in the performance of Mile. Parodi, whose art is said to be "based upon a bountiful nature" whose voice is "a symbol of the soundest vitality and the most perfect harmony," if we are to believe an Eastern critic.

Madame Patti Strakosch comes also bighly recommended for her delightful singing. Her "English Ballads in Italian style" are highly spoken of. Mr. Maurice Strakosch is no stranger amongst us. We have heard him before, and than the mentioning of his name as on the list of the performers.

Since writing the above the programme has been handed in, and will be found in the amuse ment column. It is rich with musical gems, among which will be observed the celebrated variations of Handel "Dibrayaura;" also the "Casta Diva." from Norma, of itself a rare treat when song as Mile. Parodi poly can sing it. A New Source of Light--The Darlington

The Darlington Cannel Coal Railroad Company of Reguer county are now in successful onerstion, sending out about one hundred and fifty tons per day, but cannot half supply the demand. A large amount of it is brought to Allegheny City and sold for domestic purposes, for the large bakeries and for tempering glass. For this last purpose bituminous coals do not answer, and our glass manufacturers have herotofore been compelled to use wood. The cannel scal is now used in two of our glass houses and at one in Bridgewater, Beaver county, and it is said to be better and cheaper for tempering than wood.

A party of Pittsburghers, Messrs. Cheny, Watson & Co., have purchased a site at the junction of the Darlington road with the Ohio and Pennsylvania road, and have commenced the erection of a large manufactory for the purpose of distilling oil from the cannel coal, and entered into arrangements with that Company for the supply of coal. By actual experiments it has been ascertained that it contains at least forty gallons of oil to the ton, and the expense of making it is not more than fourteen cents per and is not explosive. It is now manufactured successfully in New York and sold at one dollar mercury sinks at 15° below zero. From the cheapness with which it can be made it is evi-

dent that it will soon be produced in quantities, tending greatly to reduce the price-a very de sirable matter. The Darlington Company owns five hundred and fifty acres of cannel coal-have at a great expense completed their road, and are now in full connection with the Lakes and the Ohio river-a central position that must secure them great advantages. This voin of cannel coal averages from four-

teen to fifteen feet in thickness, and is overlaid with a vein of cannel coal shale of ten feet in thickness, which, although not good for fuel, contains as much oil as the coal. The shale of Mr. Andrew Ikeler, of Hayfield township, found the Frenchman dead, and the Kentuckian being composed mainly of oil and earthy matter. and the coal of carbon and oil. It is computed that, at a low estimate, there is in every acre past, with lucid intervals, but her friends enter. Ohlo, says that the common people of that city forty thousand tons of the oil-yielding substance: a mine richer in wealth than the gold-yielding quartz of California.
