OFFICIAL PAPER OF THE CITY. PITTSBURGH:

WEDNESDAY MORNING .... NOVEMBER 21

MORNING POST JOB OFFICE. We would call the attention of MERCHANTS AND BUSINESS MEN to the fact that we have just received from Philadelphia a number of fonts of new Job Type, and are now prepared to fill orders for Cards, Circulars, Bill Heads, Paper Books, Posters, and Programmes for exhibitions. All orders will be promptly filled.

THE NEWS: The imports of Dry Goods at the port of New York last week were \$1,200,601, against \$571,-122, the corresponding week last year. Hugh Kirkland, the street preacher, was an

000-\$20,000 by a number of book publishing firms, \$25,000 by the Corn Exchange, and \$28,-

000 by sundry other citizens.

The coal dug from the mines of Pennsylvania the past year is over six million of tons. This is worth at market at least four dollars per ton. or twenty million dollars-a larger amount than the entire Wheat crop of Ohio most years. A bloody and fatal affray occurred in Doniphan, Kanzas Territory, a few weeks since, in which a Free Soiler named Collins was shot

through the heart by a man named Laughlin, and several others were more or less hurt. It grew out of the ill feeling between the free and | Or \$3,858 per mile. slave State men. If the account given by a correspondent of the St. Louis Republican is true, Collins was the aggressor.

The New York Post publishes a letter from France, received by the Pacific, which says it is understood in official circulars that the Emperor of France had made his Will, which provides that in case of the death of the child to which the Empress is shortly expected to give birth, or in case of the death of Napoleon III, without any direct heir, France is again to become a Republic under the Presidency of Prince Napo.

THE JOURNAL .- That remarkable phenomenon, the Pittsburgh Journal, affects to have discovered another "inconsistency" in the Post. charges; but this one may have a moment's at-

We said that the Democracy of Pennsylvania, as a party, had never formally endorsed the months. Nebraska bill as a Democratic measure. Some Democratic members of Congress from this State endersed it in form, and Democrats, of course, and England:

The following con- lines about the first of January enauing. When siderations affecting the two countries ought to the spring opens, new lines of the most subrender such a contest impossible: "England is at present engaged in a war which costs her thirty to forty millions a year, and is adding about twenty millions a year to her already enormous national debt. A war with the United States would double her extend the control of the every prominent business place in the Union.

for every soldier whom she can raise, for service of course, but if she goes to war with the of course, be a very rapid increase in the amount United States, she must find 50,000 or 60,000 additional soldiers, or abandon her possessions in tolls ever reaches the point now in conteminada, and of the British West Indies, it is not bags will eventually be left entirely to the newsilling to resist the whole military force of the United States, year after year, during a long of a third person. ad deperate war, without the aid of a powerul English army.

United States for three fourths of the cotton which employs her manufacturing population; and, if any considerable quantity of grain or our is to be obtained from anywhere, this year, pread at starvation prices, and half our manu. acturing population starving and rioting in our

manufactured goods, and other products of Britsh industry, of the value of a hundred millions sterling, and receives an equal amount of pro lucts of foreign industry in return. All this prodigious amount of national wealth, with the hips which convey it, will become lawful prize to a swarm of American privateers from the day which war is declared. In addition to the miseries and the crimes which such a war will produce during its con-tinuance, it will leave behind it the most deadly for his fair readers.

hate, between the people of England and a people of a kindred race, who will, in a few years, form a great community, of a hundred millions of souls, stretching across the North American ontinent, from the Atlantic in the Pacific oceans "Such will be the losses of England in a war with the United States; and now let us see what will be the losses of the United States in a war with England. "The people of the United States, at the pre-

sent time, pay no direct taxes for government speaking, of ) Whatever taxes they pay, are in the form of moderate duties on imports. A year it was not accepted. Gen. V dours had addressith England would treble their expenses, and sed a protest to Mr. Maroy relative to the invadestroy all their present sources of national re-venue. A revenue of at least thirty millions would be required to carry on an offensive war the commander of Fort Duncan with frin against Canada and New Brunswick, to fit out a Texas, recommended to the Legislature to a voted for it, and some against it. That is well testimony in regard to the late conduct of the large navy, and to defend the coast of the United States. No Pennsylvania State Convention has people and governments of the United States, from Maine to Texas, and from the Texas debt. southern point of California to the northern ex. tremity of Oregon. Grinding, direct taxation, terest, could alone meet the expenses of such war. A national debt, bearing a strong family States Treasury to-day the \$60,000 belonging

can citizen. "The property of the people of the United States is at present fully as much scattered While not a test of Democracy, it owes its existence to Democratic votes. The Post supported it, and believes it right yet. But, if our next neighbor thought otherwise, he was no less at Democrat on that account. If any one is by purchasing so large a part, to give a regreat outlet closed. American industry would ose its reward, and American property its

> "The question of slavery in the United States, already full of difficulty, would become frightfully dangerous; for one of the first consequences of such a war as that which is now spoken of would be the abolition of slavery is world now, but they could scarcely go to war wi hout going to war with France, Spain, Tur-

war with Austria, which has noither forgotten nor forgiven the affair at Smyrna. Russia is the only ally that the United S ates could rely on, and Russia has quite enough to de to defend "The United States are not armed, and could opposition paper, but one of the best conducted, the Governor of Nova Scotla; for it is those not develope their warlike resources in less than one or two years. England and France are sian fleet in the Black Sea, and the capture of-Sebastopol, liberates fifteen to twenty steam

lipe-of-battle ships for any other service. The Russians have not a single line of battle ship afloat in the Black Sca. "Such is a fair and frank statement of what both countries would be likely to less by a war. What either of them would gain, we will leave others to say, not being able ourselves to perceive any possible gain to either country. there is any real danger of war, the people of England and the United States ought to take the matter out of the hands of their rulers, of the kind before the public: and to declare, unequivocally, that no such

fratricidal conflict shall take place." GREAT IMPROVEMENT IN THE TELEGRAPH. The New York Herald announces a new tele-

graphic invention and the formation of a new telegraphic company, composed of some of the staunchest business men of the country, who propose to themselves the task of entirely revolutionizing the whole telegraphic business of this continent; and to perform which, it has ample threat, recommended by Dr. Curtis in his advertisement, cash means, large enterprise, an appreciation of strikes us so the true one. It is now generally admitted by the wants of the public, and the sole ownership our best physicians, that local difficu of the patent for this country of the most wonderful instrument for telegraphic purposes ever invented, viz : To the Electro-Magnetic Printing throat and lungs may not be treated in the same manner; Telegraph, invented by David E. Hughes, of Kentucky. The Herald adds :-Most of our readers will recollect the description given in the Headle a few months are

been in New York, where its capabilities were fully tested in presence of numerous competent judges. We should hardly dere to give publicity to the statements of the wonderful powers of his machine, as manifested in their presence, did we not know that the persons making them are entitled to the fullest credence. Its most prominent points of excellence are : reliability. economy, speed and accuracy. In these respect it is so far ahead of any machine now in use, that a comparison with them is out of the ques-tion. It will print, as we are told, from three to five hundred letters, or from fifty to one hundred words in a minute, without the possibility of error It will send two messages simultane. ously, in opposite directions, over the same wire. It works with the most perfect secresythat is, it will send a communication from the point of departure direct to its destination, without the possibility of any way office on the route receiving a copy, excepting at the will of the sender. This a feat which no other instrument now in use can perform, and one, the advantages of which must be apparent to every individual who is at all conversant with telegraphic matters. It is very simple in its operations.

Any person who knows a letter of the alphaet when he sees it can write as correctly with this instrument as the most experienced operacoived several numbers of a new Commercial more pleasantly than by dropping into Masonic rator: all that is requisite to insure absolute correctness being that the copy shall in the first instance be written plainly and correctly. The machine verifies itself—that is, at each revolution the operator can tell, by means of an unerring test in his instrument, whether it is in wood street. Balm of Thousand Flowers, for beauti. is communicating in a distant city. But its most wonderful feat, and that which will test the reader's oredulity the severest, is its power reliable and convenient quotation of all articles

N. P. Willis, who, like a true dandy, is dressed distant office, without the help or even presence there kept in market. Boston has two such in the first style of fashion; the Tambs; the Commercial newspapers, New York three or Astor House; Castle Garden—everything as four, Philadelphia two, Cincinnati. St. Louis. New Orleans and Louisville each one. The buildings. We repeat, if any of our readers Washington, may, at any time, lock up his ofprice of the Louisville Commercial Review is \$8,00 per annum.

Wish to spend an hour agreeably—and at the same time get a very complete view of New York or New York or New York—let him drop into Masonic Hall and take all fairly printed out, and ready to be enveloped at large transport of the choose.
