

# THE MINERS' JOURNAL,

AND POTTSVILLE GENERAL ADVERTISER.

I WILL TEACH YOU TO PIERCE THE SECRETS OF THE EARTH AND BRING OUT FROM THE CAVERNS OF THE MOUNTAINS METALS WHICH WILL GIVE STRENGTH TO OUR RINGS AND BRING TO OUR USE AND PLEASURE—DR. JENNINGS.

VOL. I.

POTTSVILLE, PA. WEDNESDAY MORNING, JANUARY 31, 1888.

NO. 7.

PRINTED AND PUBLISHED BY BENJAMIN BANNAN,

510-512 MARKET STREET, POTTSVILLE, PA.

THREE DOLLARS and FIFTY CENTS per annum, payable semi-annually in advance. If not paid within the year, \$1 will be charged to all those who receive the paper free of postage. To mail subscribers, \$3 per annum if not paid within the year, 50 cents will be added to the price of the subscription.

Single Copies, 10 CENTS. Foreign postage, 25 CENTS per annum in advance.

Advertisements not exceeding twelve lines will be charged 5¢ for the first line and 3¢ for each insertion thereafter. Larger ones in proportion. All advertisements will be inserted until ordered out, unless the time for which they are to be continued is specified, and will be charged accordingly. Yearly advertisements to the paper—with the privilege of keeping one advertisement not exceeding 3 square inches standing during the year, and the insertion of a smaller one in each paper for three consecutive times. All letters addressed to the editor must be accompanied by the name of the advertiser, and otherwise attention will be paid to them. All notices for meetings, &c., and other notices which have heretofore been inserted gratis, will be charged 25 cents each, except Marriages and Deaths.

## ENGLAND.

The trade of the potteries in a reviving state. Considerable orders have been recently received, and manufacturers which have been standing still are again about to resume something like some business in the American trade will make them busy throughout the winter. *North Staffordshire Mercury.*

William Rathbone, Esq., a member of the Society of Friends, has been elected Mayor of Liverpool. In announcing his acceptance of the office to the Council, he said: "Born a Quaker and used to the plainness of the sect, I confess that to my mind, it would be painful to be accompanied to any place of worship by all the paraphernalia of office. The law does not permit the clergyman to go to church on a Sunday to the Church; but if the wish of the Council, that they should go to their own place of worship, accompanied by the Mayor and paragonalia, such as my respect for the Judges and the law of the land, that I should feel no possible objection to it. I only speak for myself—I do not judge as to the conduct or motives of others."

Brampton Hiring Fair was attended by a great number of both male and female servants. The wages were very low, and a considerable number of both sexes left the town unhired.

**Enlistment Extraordinary.**—On Tuesday, the sergeant of the 20th Regiment at Newbury, enlisted at Hungerford, a fine looking youth. On taking him before Mr. Robinson, the surgeon, at Speenhamland, on Wednesday morning for examination, he hesitated to undertake upon which Mr. R. remonstrated with him, which led to the statement that he was a woman, "impossible," said Mr. R. "I must be mistaken." The truth at once burst upon Mr. R.'s mind, and the supposed youth took her departure. Afterwards, to keep the game alive, she enlisted into the 76th and the 98th regiments, parties of both being also stationed at Newbury. The heroine is a native of Oxford. *Reading Mercury.*

**Dreadful fire and loss of life.**—On Tuesday night, the inhabitants of Southampton, were alarmed by cries of fire, and a dense body of smoke was seen issuing from the centre of the extensive premises of Messrs. King and Witte, lead, oil, &c. merchants situated at the bottom of High Street. Nearly three quarters of an hour elapsed before an engine made its appearance, during which time, from the inflammable materials on the premises, the flames had made considerable progress. No sooner were the large iron gates burst open, than hundreds of people rushed in all endeavoring to rescue some part of the stock. It is now our painful task to announce a scene which boggles description, about which did not prevent many persons rushing into it, for the purpose of saving some of the property, for which many paid the penalties of their lives, for in one instant a tremendous report, followed by volleys of flame, brought down to their devoted heads the whole of the roof, different floors, and front. It was a harrowing sight to see some, enveloped in flames, rush into the street, while others, nearly going their exit, fell back into the flames. The engines were put into full play, and the flames in a great measure subdued, when the groans of the sufferers buried under the rains, on whom the front had fallen were heard rending, and attracted a considerable number of firemen, &c. to the spot, who, notwithstanding the dreadful heat commenced digging. After a search of about two hours, seven bodies were found, some of whom were so dreadfully burnt as not to be distinguished. The flames were got under by nine o'clock on Wednesday morning.

**Fatal encounter with Poachers.**—On the night of the 4th instant, two men, named Cook and Bromfield, accompanied by a terrier dog, were discovered laying snares for game in the East of County's preserve, at Italy Cross, near Worcester. The keeper challenged the men, who set the dog upon him, the animal fastening on his throat, and dreadfully lacerating him. Assistance arrived, and a desperate encounter between the keepers and the poachers took place, in which James Bromfield was killed, and Cook secured, and lodged in Worcester Jail. The keeper was so dreadfully lacerated that he was unable to attend before Thursday, when Cook was fully committed. *Worcester Journal.*

Within the last three days we have had personal experience of the great advantages afforded by the railway, having travelled upwards of 600 miles upon the Grand Junction. Liverpool and Manchester Railway, in about 20 hours. This fact alone is enough, we think, to establish the wonderful facility afforded by these stupendous undertakings for quick travelling, and their economy both in time and expense. *Sun.*

**Foot Race.**—On Monday, there was a foot race of one mile over Kernal Moor, for £3 a side, between Dankerley of Oldham, and Jack-o'-Poules, of Royton. They kept nearly together until the last hundred yards, when Dankerley took the lead, and won by four yards. The distance was run in 4 minutes and 51 seconds.

Within the last few days upwards of 4,000 tons of mangie wurzel have been sold by Messrs Bentley, Stunt, and Spring, growers of that article; it is to be conveyed to Obolca, for the purpose of being manufactured into sugar. *Keating's Gazette.*

**Dreadful Accident at a Colliery.**—A most afflictive accident occurred at the colliery of Glimbles, Oldham Edge, Oldham, the property of Messrs. Barker, Evans, and Co., on the 17th morning. William Farrow and James Walsh, two of the miners, while working in the mine, endeavored to ascend to the surface by the shaft when a screw, by which the iron and hoar of the wagon was attached to the shaft, gave way, and the men as well as the wagon fell a very considerable depth to the bottom of the shaft; they were injured in a shocking manner, and instantly killed; the tub was broken to pieces by the fall. The two sufferers were married men, under middle age and have left several young children. *(Manchester Guardian.)*

**A Wife Poisoned by her Husband.**—A poor woman, between 70 and 80 years of age, being suddenly taken ill on Friday last at Glimbles, and being found by a very respectable physician on Sunday last, the circumstances, coupled with the man's previous strange conduct, caused a suspicion with regard to her death, and the body was consequently examined, and underwent a post mortem examination by Mr. Stephens, and Mr. Walsh, who detected the presence of arsenic in the cavity of her stomach. The deceased was a member of a benefit club, which entitled her husband to £10 at her death. An inquest was held, when the jury returned a verdict of wilful murder against him, the husband, who has been committed to take his trial. *(Worcester Journal.)*

**Singular Experiment.**—An experiment is in course of trial at Guernsey, with every probability of success, to rear sea fish, in fresh or rather slightly brackish water. They are gradually accustomed to the change; and mollet, turbot, plaice, and smelts, have thriven in the new mode.

**Suitcase of Mr. Dobby, the Comedian.**—We regret to announce the untimely decease of Mr. Dobby, a gentleman esteemed in this town by a large circle of private friends, and for many years one of the most popular comedians on the British stage. The deceased had recently been playing at Gloucester; but about ten days ago, came for a short time to reside with his brother, in Newton street, in this town. He was shortly afterwards seized with a low fever, and, in his language, was occasionally incontinent of insanity. On Friday afternoon, Mr. Phillips, a person in the employ of Mr. S. Beal, lead merchant, heard an alarm proceeding from the house of Mr. Dobby, and on proceeding to ascertain the cause, he found the unfortunate deceased suspended from the rail of his bed. He was quite cold, and appeared to be dead for some time. An inquest was held before Mr. Whately, the Jury returned a verdict of Temporary Insanity. *(Birmingham Advertiser.)*

The number of lives lost by the late disastrous fire at Southampton is now stated to be 51, several of those who received injuries at the time having since died. A subscription had been opened for the benefit of the relations of those who were killed, and several handsome donations have been made, among which are those of the Municipal Council, Mr. Dalling and Lord Viscount, 100 guineas each.

## IRELAND.

**Ulster Canal.**—This vast work, which ultimately will connect the two great inland waters of Lough Neagh and Lough Erne, has been completed to the town of Monaghan—a distance of twenty-six miles—and was, on Tuesday, opened for the purpose of trade. Two of the canal boats, laden with coal, were on that day taken into the lock at Charlemount from the river Blackwater, and from thence dispatched—the one to sell her cargo at Caledon, and the other at Monaghan—at each of which towns they respectively arrived without meeting any obstruction or hindrance in the navigation. Colonel Burgoyne, Chief Commissioner of the Board of Works; Major Jones, one of the Commissioners for the Improvement of the Shannon; Mr. Cubitt, the Engineer; and several scientific gentlemen had been down previously inspecting the works, to all whom, we understand, they gave the highest satisfaction. *—Derry Journal.*

**Illuminations.**—The village of Mount Nugent, in the county Cavan, was tastefully illuminated on the arrival there of Mr. and Mrs. Nugent, (whose marriage we announced in our last.) On their approaching Ballygrosso, the seat of Christopher Edward Nugent, Esq., the numerous tenantry assembled, hoping to be permitted to remove the horses and draw the happy pair home; but Mr. and Mrs. Nugent would not consent to it and the carriage slowly proceeded, surrounded by the delighted people, who received them with every demonstration of joy and respect. The peasantry were plentifully regaled, and in the evening a number of the neighboring gentry entertained at Ballygrosso, the family mansion.

**Mr. Sheil in Office.**—The electors of Tipperary will probably have to gird up their loins for another struggle. We have just been informed that one of their representatives—the highly gifted Richard Sheil—has been appointed Secretary to the India Board. We believe the salary is about 2,500l. per annum.

**Evening Exercise.**—The consecration of the new Roman Catholic Chapel of Ahoghill. On Sunday last this very splendid and substantial building was consecrated for divine service by the Rev. Dr. Deeniv, assisted by the Revs. Messrs. Magarry, Curoe, MacCrickard, O'Doherty, and M'Court. The sacred edifice, which is very large, was filled by persons of every religious denomination, and of different ranks, who gave the best proof of their satisfaction by the gener-

city of their contributions. The amount of the collection was 40l. 10s.

**Killygordon male and female schools.** The friends of education will be happy to hear of the flourishing state of these schools, which, in point of numbers, proficiency, and respectability, quite surpass any other in that part of the country. Since the appointment of Mr. and Mrs. Taylor, as the teachers, in February 1886, no schools have evinced a greater change or increased to a greater extent. At their appointment there was but forty scholars. There are at present three hundred and twelve, all in regular attendance, and receiving the benefits of a sound and well ordered education. These scholars are under the patronage of Johnstone Mansfield, Esq., who is very attentive to the schools, and also liberally provides for the comfort and support of the teachers. *—Derry Sentinel.*

**The Drogheda Journal states,** that a rumor is in circulation to the effect that Morgan O'Connell, Esq. M. P. for Meath, will accept the Children's Bill, immediately after the meeting of parliament, the hon. gentleman having been appointed to a high situation under her majesty's government. It is added, that should a vacancy thus occur in the representative of Meath, Matthew Corbally, Esq. J. P. of Corballis-hall, will offer himself to the consideration of the electors.

The Earl of Clanricarty has subscribed 300l. towards a charitable fund for the relief of the poor of Ballinacree and its neighborhood.

Mr. Shean, a man of gentlemanlike appearance, was held to bail on Wednesday, at College street police office, for having forged a bill of exchange for 1,000l. upon the Norwich Insurance Company, connected with a policy on the life of Mr. Hussey, of Rathenny; Meath, who was erroneously reported dead.

The poor this year are in comparative comfort to what they were last. The sufferings and privations endured last winter could not be described—provisions of all kinds scarce and extravagantly high—firing not to be got at any price, whilst the scarcity of money, want of confidence and credit, and the losses sustained in every pursuit, made the year a calamitous one. As well as thankful to Providence for the blessings we are now enjoying, we are called on to exercise a prudent foresight, to guard against similar visitations. By strict economy a fund may be provided that will relieve us from the consequences of bad crops; and as to firing, it will be the fault of the people in this immediate neighborhood if they feel the loss of it. It is well known that in Kildowen Glebe, coal has been long discovered; that the smiths contiguous have long been using them, that they are of the best quality, and near the surface. In any other country a treasure such as this would not lie dormant. Why is not a meeting called, and a subscription entered into, to get the colliery examined by a competent professional man? The expense would be trifling; and should the test turn out favorable, as it is presumed it would, no doubt those wishing well to the county, or anxious to confer benefits on the poor, would contrive to have it wrought. *—Ballyshannon Herald.*

## SCOTLAND.

**Present of Shetland hosiery to her majesty the Duchess of Kent.**—Some of our loyal countrywomen have, we understand, sent up to London some specimens of Shetland hosiery, consisting of stockings and gloves, for presentation to the Queen and the Duchess of Kent. These stockings are said to be as fine a specimen of our native manufacture as any that have been made. They are spun from the lambs' wool, and knit by hand, as usual, and notwithstanding the thread is composed of three finer threads twisted together, such is the delicacy of the texture, that a pair of stockings can with ease be drawn through the smallest wedding ring. We know not whether our good countrywomen, now that so many parties are reported to be anxious to get the length of her Majesty's foot, have thought it expedient to get their staple manufacture also put upon a good footing; but this we will answer for, that if, now that the winter is setting in, her Majesty will deign to wear her Shetland stockings, she will be forced to acknowledge that among all her subjects, none have afforded a more delicate, and at the same time a warmer proof of their attachment to her majesty, than the loyal females of Shetland. *—Perth Courier.*

**The Highlands.—MARKETA.—Killygordon, Nov. 14.**—The Martinmas feasting fair was held here to-day. Besides engaging of servants; little other business is usually transacted at this fair, for which purpose farmers and graziers come from a considerable distance, especially the western districts of the county; and, on the present occasion, we observed a few from the head of Argyllshire, nearly 30 miles distant. Servants' wages were pretty high, more so, indeed, than was ever known at any former period.

The wages for young women ran from five to seven pounds, and those of young men from ten to thirteen pounds per annum. Those who require a servant man and two maids look upon it as an additional cost, and cry mightily against it, as exorbitantly high.

**Robbery of the Australian Museum, Glasgow.**—Between Saturday night and Sabbath morning our Museum was entered by thieves, and a number of rare coins in gold and silver carried off, amongst which were sixteen or seventeen gold Roman Emperors; twelve silver Grecian coins; medallions in silver of all the Kings and Queens of England; a gold medal presented by the King of Denmark to the late Professor Wilson, beside a parcel of donations in silver and gold.

**Scottish Guardian.**—A goodly chest was stolen some time ago from a carrier's cart in the street, and suspicion fell upon a woman, who is a well known conveyancer. To her abode the luckless carrier hied him, accompanied by a friend, and the theft was laid to her charge, which she stoutly denied at first, but on being advised to make restitution and avert punishment, backed by an offer of a shilling by the carrier, and another by a friend, she admitted the theft, adding, "I weel sirs, mak' it aughten pence a-piece, and the chest is yours." *—Glasgow Herald.*

Through the want of rain was not much done in linens in the beginning of last week, we are glad to say they were more in demand since—prices as before. More has already been done in yarns, but a small reduction in the price of tow yarns; fax yarns unaltered and in good demand.

## Dundee Courier.

**Glasgow Nov. 18, Emigration to New South Wales.**—It was with great pleasure that we observed a short time ago, that government acting upon the most liberal and enlightened principles, had determined to infuse a new spirit into the population of this great and important colony, by encouraging the emigration thither of a number of married mechanics and husbandmen, with their wives and families; and that they had intrusted their selection to Mr. Dobbie, surgeon of the royal navy, a gentleman who lately arrived in this country from Sydney. We now understand that Mr. Dobbie has secured about seventy of this class of our countrymen, of the very highest moral and professional character, and engaged for their conveyance the fine ship *Duncan* of Liverpool.

## WALES.

**Unaccountable Suicide.**—On Wednesday morning, Evans Howell, forge engineer at the Aberdare Iron Works, was found in his cow house, suspended from a beam, so low that to accomplish his object, he was nearly in a sitting posture. The surgeon, Mr. Roberts, fortunately passed it shortly after the body was found, but life was quite extinct. He was in the prime of life, an excellent workman, gained at least 30s a week and lived happily with his wife, and no possible cause can be assigned for this dreadful act. He had worked the preceding night, and had been seen by his neighbors losing his cow to water. A widow and four or five young children are left to mourn this awful catastrophe. An inquest on the body was held on Thursday, before Wm Davies, Esq. coroner, and a verdict returned—"Insanity."

**New Project for Lighting the town of Aberystwyth with Gas.**—Many of the inhabitants are highly delighted to learn that they are likely to have the comfort of gas without any additional taxation. His worship the Mayor at the last quarterly meeting of the council, proposed to their consideration the propriety of extending the leases of houses built on corporation property, for the term of 11 years, for a sum to be paid in advance, which would produce two thousand five hundred pounds clear; and for a council to make a present of the sum to the Commissioners for improving the town for the purpose of lighting the town with gas. Should the mayor be able to carry his plan into execution, he shall undoubtedly have the warmest thanks of his fellow-townsmen.

**Mammoth.**—A beautiful Roman gold coin of the Emperor Valentinian, was lately dug up at Trellech, near this town, in the most perfect state of preservation, the impression being as sharp and distinct as when first struck. The obverse displays a bust of the emperor, his head bound with a diadem of jewels, and his shoulders covered with the imperial robe, surrounded by the legend *DN VALENTINIANVS PAVGVS*. On the reverse is a whole length figure of the emperor in a military robe, in his right hand the celebrated *labarum*, or Christian standard, which was substituted after the conversion of Constantine for the Roman eagle; in his left he holds a globe surmounted by a figure of victory; the legend runs thus: *RESTITUTOR RERIPUBLICAE*. In the exergue is a star, and two letters, apparently by some accident erased the two

latter ones, we surmise which is probably significant of the place where the coin was struck. Its execution appears to be the production of an era when the arts were in the highest vigour. It is now in the possession of Mr. Mackwell, Church street.

**Brecon Fair** was more moderately attended than usual. Fine cattle and good oxen met a very ready demand, and a number of sales were effected at good prices. The horse fair was not so brisk, none but the very best carriers meeting any demand. The light-fingered gentry, we are sorry to say, were very numerous, and very successful in a great many instances, women being their chief victims. Losses to great amount were sustained, some as high as 29l. others 20l. and many small sums.

**Public Baths at Garth Point.**—We are happy to hear that this much wished for establishment is about being carried into immediate execution under the superintendence of Mr. John Welsh, architect of Holywell. It is expected that hot and cold water baths will be ready for occupation in the middle of the ensuing summer, so that visitors will not another season be under the necessity of leaving this picturesque city, for the want of the indispensable convenience. The appearance of the proposed Baths from the water will be very imposing, forming a colonnade of almost one hundred and forty feet in length executed in white limestone. The interior arrangement is composed of plunging, warm vapour and shower baths, with comfortable dressing rooms to each. We must pay a compliment to the spirit of our townsmen who have put their shoulders to the wheel and accomplished this very desirable public work.

**10,000 QUILLS** from 25 cents per 100 to 12 1/2 each, just received and for sale by B. BANNAN, Dec 23

**FIVE BOOKS.**—A few new books just received and for sale by B. BANNAN, Dec 22

## E. S. CURTIS' Celebrated "Blue" Black Ink.

Forwards, just received and for sale by J. B. BANNAN, Jan 6

## Swain's Panacea.

As the impurities and luxury of the age are hastening the ravages of scorbutic complaints and rendering the blood more impure, and thus destroying their constitutions, it is necessary to apply the proper remedies—such as Swain's Panacea must be, and has been, more than doubly valuable as a certain and effectual means of restoring them to perfect health and vigor. Few diseases are more common, or more dangerous, than those which are attended with scorbutic affections, which exhibit various symptoms, as eruptions, ulcerations, debility, loss of appetite and digestion, all arising from impure blood, and if not properly attended to, produce the greatest injury to the constitution. Swain's Panacea is recommended at this season of the year, as a valuable restorative of the system, thereby invigorating the constitution, and enabling it to bear the debilitating effects of the summer season. It is a powerful purgative, dissolves the fluids, and corrects their tendency to all the diseases which originate in vitiated blood, dissolved liver, depraved appetite, or predisposition to affections of the lungs, &c. No one, however, should neglect this means of conveying the truth of a fact which has been proved.

This medicine is now used with success in all parts of the world, and is gaining great reputation in England.

A fresh supply of the Medicine just received and for sale by B. BANNAN, Jan 10

Who can supply the above medicine wholesale to them who wish to sell again, at Philadelphia apply May 14

## BRANDRETH'S

### Vegetable Universal Pills.

INVALID—ONE DISEASE has but only one remedy, and that is to remove its cause, by restoring the circulation, bringing on pain or derangement in the organs or parts where such disease is seated. It is the result of a HABITUARY OF CAUSES may bring about the state of the blood—such as a violent bruise, fall, drop foot, indigestion, pain in the head, &c., and although it may be said that these diseases have not their origin in impurity of the blood, yet they all have the same, they all end in the impurity of the blood; and our only object to prevent the irritating influences be kept up, in other words, as long as the disease is continually to purge the body, as long as any disease symptoms remain. This is done by BRANDRETH'S VEGETABLE UNIVERSAL PILLS, which, if taken in sufficient quantities to produce copious evacuations, will assist nature to restore every organ to a state of health. This is the best mode of driving out a morbid humor, and driving out from a state of sterility, so as to produce a most abundant fertility; and so it will with the human body when any thing is the matter with it, we have only occasion to drink it by purgation—and experience has proved these pills to be the best medicine for driving out any disease; because consistent with our nature, that they have acted rightly, the result having been sound health. It is not more than 15 months since these Pills were introduced into the United States, but they have been almost everywhere unprecedented, there being no other of them in New York in that time, fully one million five hundred thousand boxes. And about 10,000 persons can be referred to in New York city, and nearly the same in Philadelphia, who are benefited by these pills; others who have become altogether unwell, of diseases which appeared of the most oppressive character, and in many cases where the disease ravaged the system, and had but little chance of recovery when all appeared so lost, human means could save life, but by the use of these Pills, have been restored to good health, the foregoing evidence having been completely eradicated.

Dr. Wm. Brandreth was the fully convinced of the truth of the above simple theory, that he spent 30 years experiment and laborious research into the medical properties of the numerous plants composing the vegetable kingdom, his object being to discover a medicine which would at once purify and produce by specific action, a removal of all humors from the blood by the stomach and bowels, and by the continuation of the use of such a medicine, such humors are sure to be carried off, and the blood is purified; and whoever takes these Pills, and perspires with them, will be satisfied that Dr. Wm. Brandreth, fully stated his philanthropic object. It may be absolute and known, but it is not every one who knows whether it is in the blood or feet, in the best or most eminent member; whether it be an outward ulcer, or an inward cancer, are all, though arising from many causes, reducible to the grand effect, namely, impurity of blood.

NOTICE.—As Drug and Chemical Stores are liberally supplied with counterfeits of Brandreth's Pills, it becomes those who want the genuine article to purchase only from the accredited agents, or those who are known to be above such imitations; and the fact that the name Brandreth's Pills for sale, therefore all purchases of them are sure to be counterfeited. Dr. Brandreth's Office for the sale of the above Pills wholesale and retail is at 169 Race street, first door above third at north side; Philadelphia. Sole agents in this city and throughout the United States, Miller & Haggerty, No. 105 Arch street, Philadelphia.

By order of the Court.

WM. B. HULL, Administrator. JOSEPH MORAN, Clerk. O. C. G.

## LARD—20 Kegs first quality Lard for sale by T. & J. HAGGERTY, Nov 25
